differences of these networks is there a language universal ontology how much information can be shared across languages First attempts to answer these questions are given in the form of a set of shared or common Base Concepts that has been derived from the separate wordnets and their classification by a language neutral top ontology These Base Concepts play a fundamental role in several wordnets Nevertheless the database may also serve many practical needs with respect to cross language information retrieval machine translation tools language generation tools and language learning tools which are discussed in the final chapter The book offers an excellent introduction to the EuroWordNet project for scholars in the field and raises many issues that set the directions for further research in semantics and knowledge engineering
