THE ARITHMETIC OF EQUATIONS

SECTION REVIEW

Objectives

- Define the arithmetic operations required in general equations and their applications.
- Identify the arithmetic operations in linear and non-linear equations, negative exponents, fractions, and powers as they are SPP.

Key Terms

- arithmetic operations

Part A: Completion

Use the information provided to fill in the blanks and complete the following equations and statements about arithmetic operations and their applications. Don't forget to use the strongest form of each word when you are done.

The most efficient way to solve linear equations is to use the addition and subtraction properties of equality.

The additive inverse of 1 is important in the multiplication property of equality.

Arithmetic operations follow the left-right order of operations: Only 2 and 3 and 4 and 5 and 6 and 7 and 8 and 9 and 10 and 11 and 12 and 13 and 14 and 15 and 16 and 17 and 18 and 19 and 20 and 21 New Side by Side Solutions to examples pair an algebraic solution and a graphical representation to accommodate different learning styles. New Technology dependent modeling sections introduce the idea of mathematical modeling of data through linear quadratic exponential logarithmic and logistic regression. New Integrated web resources include selected Take Note boxes identified by a special web icon which direct students to an interactive example or a downloadable file on the web site. These special resources can be used by instructors for presentation purposes or can be assigned to students to help them visualize a concept. New Concept Lists now prominently feature all the major topics at the beginning of each section preparing students for the concepts to follow. A wide range of applications exercise sets and supplemental exercises many involving real data encourage problem solving skill building group work writing and manipulation of graphing calculators. Exploring Concepts with Technology a special end of chapter feature expands on ideas introduced in the text by using technology to investigate extended mathematical applications or topics. Projects at the end of each exercise set are designed to encourage students or groups of students to research and write about mathematics and its applications. Additional Projects are included in the Instructor's Resource Manual and on the book's web site. Topics for Discussion conceptual exercises included at the end of each section can be used for discussion or writing assignments. Take Note and Math Matters formerly called Point of Interest margin notes alert students about interesting aspects of math history applications and points that require special attention.
