UNDP's first Africa Human Development Report shows that food security and human development reinforce each other If African countries are to realise their long term potential the report says they must boost agricultural productivity to both improve the availability of food and reduce poverty Policies to enhance nutrition are central to ensuring that access to food translates into human development The report argues further that local populations must have the resources and decision making power to produce and consume nutritious food throughout the year overcoming the risks represented by continuing conflict climate change and variations in food prices **Ghana's Economic and Agricultural Transformation** Xinshen Diao, Peter Hazell, Shashidhara Kolavalli, Danielle Resnick, 2019-08-29 This is an open access title available under the terms of a CC BY4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Many African countries have experienced unprecedented rates of economic growth in recent years yet their economic transformations display features that could constrain their future growth prospects

Patterns of urbanization without industrialization rapid growth of low productivity jobs in the informal economy and a neglected agricultural sector with increased need for important foods are all areas for concern as Africa continues to develop Using Ghana as a case study Ghana s Economic and Agricultural Transformation Past Performance and Future Prospects integrates economic and political analysis to explore the challenges and opportunities of Africa s transformation It examines Ghana s overall economic performance since it went through a major Structural Adjustment Program in the early 1980s and provides an in depth empirical analysis of the broader economy and the agricultural sector over the last four decades It explains why Ghana has not transformed its economy more substantially why its agriculture sector has not played a greater role beyond cocoa production and what must be done in the future to achieve a successful transformation In addressing these puzzles Ghana s Economic and Agricultural Transformation considers what the rest of the world can learn from Ghana s experience

The Human Cost of Welfare Phil Harvey,Lisa Conyers,2016-02-25 Why is the welfare system failing to work for so many people This book examines the problems with the current welfare system and proposes reforms to create a smarter smaller system that helps people improve their lives through rewarding work Unlike other books on welfare this one draws on the stories of more than 100 welfare recipients who are trapped in a system that keeps them underemployed and unemployed The authors present case studies that show that being a part of a welfare program can actively result in the recipient having to limit their job efforts for fear of losing government assistance The book examines all major U S welfare systems including Temporary Assistance for Needy Families SNAP Medicaid and others The authors begin by exploring the nation s basic poverty issues and examining the relationship between work and happiness Next they zero in on specific welfare programs reporting both on their dollar costs and on the ways that they fail enrollees The book then concludes with strategies for addressing the shortcomings of the current U S welfare system This book is appropriate for readers interested in public policy government programs welfare and cultural shifts in America It adds a new perspective to the existing body of welfare scholarship by systematically assessing the impact of welfare on the receivers themselves
