Agricultural Science Paper Grade 2014:

Foreign Direct Investment in Agriculture Jan Schüpbach, 2015-10-07 Foreign direct investment in agriculture and land has increased substantially since the 2007-2008 food price crisis. However, there is a severe lack of quantitative evidence on its economic impact. Therefore, the primary goal of this study was to collect and analyze empirical evidence in order to better understand the potential benefits and pitfalls of such investments and related processes of agricultural commercialization. In particular, the study tests the effect of two strategies for including smallholder farmers into modern food supply chains: 1. Outgrower schemes, i.e. a type of contract farming whereby small-scale farmers produce crops for large-scale farming enterprises; 2. Wage employment on large-scale estates. The central part of the study looks at one specific investment project in the Zambian sugar cane sector. This sectoral focus was supplemented by a broader cross-sectoral analysis of a large nationally representative panel survey. Overall, the evidence suggests that large-scale investments by foreign as well as domestic companies, and especially the model of cooperation with smallholder farmers in outgrower schemes, can indeed have positive and significant effects on the income and wealth of rural households.

Research Methodology in Agricultural Sciences Jayne Njeri Mugwe, Steven Runo, 2026-01-01 This authored textbook provides a comprehensive guide to the methods and methodologies currently used in agricultural research, covering the entire process from conceptualisation to reporting. Recognising the interdisciplinary nature of agricultural science, the book integrates both biophysical and social science approaches, including experimental design, on-farm research, surveys, qualitative and mixed methods research, and impact evaluation. It also addresses both quantitative and qualitative data analysis. In addition to methodological guidance, the book offers practical support in scientific writing, thesis development, journal article publication, and science communication. Theories and concepts are clearly explained using real-world examples, flow diagrams, photographs, and case studies to enhance understanding. Designed to support students and early career researchers, this book helps ease the steep learning curve associated with conducting credible, ethical, and impactful research. It will be a valuable resource for students, faculty, researchers, professionals, agricultural scientists, and policy makers in both national and international contexts.

Critical Issues in Contemporary China Czeslaw Tubilewicz, 2016-12-12 Critical Issues in Contemporary China: Unity, Stability, and Development comprehensively examines key problems crucial to understanding modern-day China. Organized around three interrelated themes of unity, stability, and development, each chapter explores distinct issues and debates their significance for China domestically and for Beijing's engagement with the wider world. While presenting contending explanatory approaches, contributors advance arguments to further critical discussion on selected topics. Main issues analysed include political change, military transformation, legal reforms, economic development, energy security, environmental degradation, food security and safety, demographic trends, migration and urbanization, labour unrest, health and education, social inequalities, ethnic conflicts, Hong Kong's integration, cross-strait relations. Given its thorough and up-to-date assessment of major political

social and economic challenges facing China this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies

The Indian Journal of Agricultural Sciences, 2018 **The State of Food and Agriculture 2017** Food and Agriculture Organization, 2017-11-10 One of the greatest challenges today is to end hunger and poverty while making

agriculture and food systems sustainable The challenge is daunting because of continued population growth profound changes in food demand and the threat of mass migration of rural youth in search of a better life This report presents strategies that can leverage the potential of food systems to become the engine of inclusive economic development and rural prosperity in low income countries It analyses the structural and rural transformations now under way and examines the opportunities and challenges they present to millions of small scale food producers It shows how an agroterritorial planning approach focused on connecting cities and towns and their surrounding rural areas combined with agro industrial and infrastructure development can generate income opportunities throughout the food sector and underpin sustainable and inclusive rural transformation
