**Agricultural Education Magazine**, 1965    **CHINA: FOOD SECURITY AND AGRICULTURAL GOING GLOBAL** Han Jun, 2022-11-21

Through decades of efforts, China has overall achieved self-sufficiency in food supply, which is the result of effective policies and measures adopted by the Chinese government. This book focuses on China's food security strategy and agricultural going global strategy, and goes into details on policies and measures for achieving domestic food security. It specially analyzes the status and development trend of China's corn industry, since corn is the most sensitive grain variety that plays an important role as food, feed, and raw material for bioenergy. It also studies overseas agricultural development potential for agricultural investment and cooperation globally. It finally elaborates China's agricultural going global strategy with specific cases to evaluate policy effect in order to promote international cooperation in agriculture. The conclusions are that as the world's most populated country, China should rely on its domestic production to ensure food supply. However, with intensified constraints on resources and environment, China should appropriately adjust its food security goals to ensure the basic self-sufficiency of cereals and rely more on global markets for non-cereal grain varieties. Looking to the future, China should establish a food security system that is efficient, open, and sustainable, through profound reform to increase its domestic food productivity, promote sustainable development of agriculture, and expand international cooperation in agriculture.    [Parliamentary Papers](#) Great Britain.
