

the Productive Academic guide to Writing a Journal Article

Four Vital Writing Skills

As you write, focus on these four writing techniques. Practice them. Master them. They are straightforward but powerful tools that will transform your writing.

Start with Structure

A well-organized structure makes it much easier to write paragraphs and sentences. So, build that structure first:

Brainstorm each topic you want to discuss. Aim for broader than specific facts but narrower than multi-point arguments.

Organize your topics. Cluster them in different sections. Arrange them in order of importance, step-by-step, or from simple to complex.

Fill each topic with content. Paste any relevant notes, citations, or data. Don't worry about organizing it, yet--that comes later.

Make One Point

Troubleshoot each paragraph by considering the following questions:

- Does it have one main point? (Can you explain the topic without using the word "and"?)
- If it makes multiple points, can you split it up into more than one paragraph?
- Does the paragraph's main point elaborate the main point of the sub-section it sits in?
- If not, should you reword it, delete it, or move it to a more appropriate sub-section?

Use a similar framework to troubleshoot sentences and sub-sections.

Focus on Paragraphs

Paragraphs--not sentences--are the most important part of your writing. So, stop agonizing over sentences. Focus on writing good paragraphs:

- Start each paragraph with a topic sentence that explains its main point.
- Add more sentences to give details, caveats, and explanations that enrich that topic sentence.
- Organize the sentences from least-to-most complex, step-by-step, or most-to-least important.

Write and Edit Separately

Writing and editing are two very different skills. You must separate them or your work will suffer.

Write, don't Edit:

- Write to get words onto paper.
- Write so fast that your editing brain won't be able to keep up.

Edit, don't Write:

- Edit to make your writing more readable.
- Edit on physical paper with a red pen. This slows things down, which inhibits writing.

Write the First Draft

Let's use the four vital writing skills to finish the first draft of

Interpreting Basic Statistics Zealure C. Holcomb, 2016-10-04 Students get valuable practice in interpreting statistical reporting as it actually appears in journals In each of the 62 exercises your students will read a brief excerpt of statistical reporting from a published research article Each exercise begins with guidelines for interpreting the statistics in the excerpt The questions on the excerpts promote learning by requiring students to interpret information in tables and figures perform simple calculations to further their interpretations critique data reporting techniques and evaluate procedures used to collect data Each exercise covers a limited number of statistics making it easy for you to coordinate the exercises with lectures and a main textbook The questions in each exercise are divided into two parts 1 Factual Questions and 2 Questions for Discussion The factual questions require careful reading for details while the discussion questions show students that interpreting statistics is more than a mathematical exercise These questions require them to apply good judgment as well as statistical reasoning in arriving at appropriate interpretations Thirteen new exercises interspersed throughout show how to interpret a greater array of statistical reporting

Interpreting Basic Statistics Keith S. Cox, Zealure Holcomb, 2021-09-30 Interpreting Basic Statistics gives students valuable practice in interpreting statistical reporting as it actually appears in peer reviewed journals Features of the ninth edition Covers a broad array of basic statistical concepts including topics drawn from the New Statistics Up to date journal excerpts reflecting contemporary styles in statistical reporting Strong emphasis on data visualization Ancillary materials include data sets with almost two hours of accompanying tutorial videos which will help students and instructors apply lessons from the book to real life scenarios About this book Each of the 63 exercises in the book contain three central components 1 an introduction to a statistical concept 2 a brief excerpt from a published research article that uses the statistical concept and 3 a set of questions with answers that guides students into deeper learning about the concept The questions on the journal excerpts promote learning by helping students interpret information in tables and figures perform simple calculations to further their interpretations critique data reporting techniques and evaluate procedures used to collect data The questions in each exercise are divided into two parts 1 Factual Questions and 2 Questions for Discussion The Factual Questions require careful reading for details while the discussion questions show that interpreting statistics is more than a mathematical exercise These questions require students to apply good judgment as well as statistical reasoning in arriving at appropriate interpretations Each exercise covers a limited number of topics making it easy to coordinate the exercises with lectures or a traditional statistics textbook
