Art Journal ,1966 What Photographs Do

Elizabeth Edwards,Ella Ravilious,2022-11-21 What are photographs doing in museums Why are some photographs valued and others not Why are some photographic practices visible and not others What value systems and hierarchies do they reflect What Photographs Do

explores how museums are defined through their photographic practices. It focuses not on formal collections of photographs as accessioned objects be they fine art or archival but on what might be termed non collections the huge number of photographs that are integral to the workings of museums yet invisible existing outside the structures of the collection. These photographs however raise complex and ambiguous questions about the ways in which such accumulations of photographs create the values hierarchies histories and knowledge systems through multiple folded and overlapping layers that might be described as the museum s ecosystem. These photographic dynamics are studied through the prism of the Victoria and Albert Museum London an institution with over 150 years engagement with photography s multifaceted uses and existences in the museum. The book differs from more usual approaches to museum studies in that it presents not only formal essays but short auto ethnographic interventions from museum practitioners from studio photographers and image managers to conservators and non photographic curators who address the significance of both historical and contemporary practices of photography in their work. As such this book offers an extensive and unique range of accounts of what photographs do in museums expanding the critical discourse of both photography and museums
