### Introduction

It is obvious that technological proliferation has occurred in every sphere of the world. The nature and proliferation of digital devices and their accompanying applications vary with geography and culture across the globe. The continues growth in ownership and usage of digital technologies in the last few decades have had a significant impact on education, particularly at the Higher levels. Smartphones have become an integral part of the daily life of many university students, even in developing countries (Hossain & Ahmed, 2016). Studies have identified that students are increasingly using a diverse range of academic apps to support their learning needs (Woodcock et al., 2012).

Globally, the use of these smart technologies improves access to higher education, facilitates communication between instructors and learners, allows for the discovery and dissemination of learning materials and removes some bottlenecks associated the mortar and bricks system. The enormous benefits of these digital devices have made it imperative for their integration into teaching and learning at higher levels of education. It is in the light of this, the article *Higher Education Students' Ownership and Usage of Smart Phones and Tablets: The Case of Kwame Nkrumah University of Science and Technology (KNUST)* attempts to investigate students' ownership and usage of the smartphones and tablets, and how they are influencing their learning experiences in the university. A sample of 183 students was used for the study. The study aimed to identify the kind of digital mobile devices (smartphones and tablets) KNUST students have and what they use them for.

### Methodology

To ensure systematic collection and presentation of data, the Author(s) of the article conducted a baseline study. A quantitative online survey was used for the study.

Bennett, 2010-11-24 Written for everyone interested in women's and gender history. **History Matters** reaffirms the importance to feminist theory and activism of long term historical perspectives. Judith M. Bennett, who has been commenting on developments in women's and gender history since the 1980s, argues that the achievement of a more feminist future relies on a rich, plausible and well informed knowledge of the past and she asks her readers to consider what sorts of feminist history can best advance the struggles of the twenty first century. Bennett takes as her central problem the growing chasm between feminism and history. Closely allied in the 1970s, each has now moved away from the other. Seeking to narrow this gap, Bennett proposes that feminist historians turn their attention to the intellectual challenges posed by the persistence of patriarchy. She posits a patriarchal equilibrium whereby, despite many changes in women's experiences over past centuries, women's status vis vis that of men has remained remarkably unchanged. Although, for example, women today find employment in occupations unimaginable to medieval women, medieval and modern women have both encountered the same wage gap, earning on average only three fourths of the wages earned by men. Bennett argues that the theoretical challenge posed by this patriarchal equilibrium will be best met by long term historical perspectives that reach back well before the modern era. In chapters focused on women's work and lesbian sexuality, Bennett demonstrates the contemporary relevance of the distant past to feminist theory and politics. She concludes with a chapter that adds a new twist: the challenges of textbooks and classrooms to viewing women's history from a distance and with feminist intent. A new manifesto, **History Matters** engages forthrightly with the challenges faced by feminist historians today. It argues for the radical potential of a history that is focused on feminist issues, aware of the distant past, attentive to continuities over time and alert to the workings of patriarchal power.
