Recent Financial Crises The late Lawrence R. Klein, Tayyeb Shabbir, 2007-01-01 Financial crises are recurring phenomena that can cause significant economic and societal loss This book is therefore vitally important as it analyzes why and how financial crises occur the extent of their impact and what can be done to prevent their recurrence or reduce the damage they cause Comprising original and never before published papers by distinguished economists this book offers insights about lessons that were or should have been learned from recent outbreaks of such crises in East Asia and elsewhere Recent Financial Crises also presents a set of econometric studies of issues such as labor market behavior investment and productivity and exchange rate adjustments Although China did not have a crisis its economic behavior was closely monitored in order to see if that had any effect on the crisis conditions In this respect the book contains an estimation of China's core inflation rate as well as its true cost of living index over a 20 year period spanning the Asian financial crisis In general collectively the studies point to a need for ongoing structural reforms to minimize vulnerability to crises or soften their impact The necessity for resorting to viable safety nets is also stressed Policymakers and central bankers will find this book of great value as will scholars and researchers at many levels of academe involved in financial business and international economics

China and East Asia's Post-Crises Community Wei Liang, Faizullah Khilji, 2012-10-04 China and East Asia's Post Crises Community A Region in Flux by Wei Liang and Faizullah Khilji explores how an East Asian community is taking shape as a result of China's emergence as a global economic power and the shocks of the financial crises emanating

from the globalized financial system Today's East Asia shows a sharp break from the East Asia of the Cold War era in both basis and orientation Important elements in this shift include the regional economic integration propelled by China's emergence as a processed manufacturing center in the world economy the common problems posed by the working of the dollar based international financial system and the desire to develop institutions that help to formalize the economic integration and financial cooperation that is taking place and may thus help protect and safeguard economic prosperity in the region Liang and Khilji show how the approach to regional economic cooperation and developing institutions comes from the bottom up lacking any leader nation grand vision or ideology The manner in which the region comes to work together also has implications for the governance of the world economy in particular the economic model that underlies policy formulation the working of the international financial system and the approach to the multilateral trading system From a security oriented US centric regional structure characterized as the hub and spokes system set up after the Second World War this region is now more nearly an informal economic community which increasingly appears to be China centric China and East Asia's Post Crises Community presents one of the first attempts to weave together different strands of the current discussion to develop a framework for understanding a rapidly evolving East Asia region
