Book of the Banned Simon Miraudo, 2023-08-01. BLASPHEMY AND HORROR, SAUCY SWEDES, LUKE SKYWALKER'S CHARRED AUNT UNCLE. Australia has censored it all. Did you know Aussie audiences were originally banned from watching bona fide classics The Night of the Hunter, Breathless, and The Texas Chain Saw Massacre, to name just a few, out of literal hundreds, or that Australians initially saw a watered down version of Star Wars in cinemas? Book of the Banned is a rigorous, rollicking, riotous, and righteously furious jaunt through film history that reveals the shocking stories behind Australia's classification system.

and how your favourite movies have been snipped down under featuring interviews with Margaret Pomeranz David Stratton a bunch of banned filmmakers and even their censors Like any good story there are heroes anti heroes unexpected criminals and downright dastardly villains though they're not always whom you'd expect But by discussing the movies scenes and lines of dialogue deemed too extreme for Aussie eyes and ears we can see how far we've come in Australia and how far we have to go A uniquely Australian ride into the dark side of film censorship pearl clutching outrages and moral panics Simon Mirando's Book of the Banned is an essential book for film fans cinema scholars and card carrying perverts alike Alexandra Heller Nicholas author 1000 Women in Horror This book is fucking great And if they put asterisks in this quote the censors will have won again Impeccably researched and superbly written Book of the Banned is an endlessly riveting slice of film history that demands to be read Chris Taylor The Chaser Upright Mirando masterfully guides us through the tangled and surprisingly fascinating history of Australian censorship and takes us on a wild journey through the rule breaking films that tested those boundaries Anchored by a detailed account of film history and censorship policy plus interviews with leading researchers and cinephiles Book of the Banned is both a lively love letter to controversial and challenging films and a call for our censorship practices to be reviewed Flick Ford Triple R's Primal Screen Important because it pulls together the exhaustive record of snipped and smothered films lying in the wake of decisions by Australian authorities John Safran

Day, 1961 **Moundbuilders of the Amazon** Anna Curtenius Roosevelt, 1991 Moundbuilders of the Amazon shows that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Additionally the comprehensive use of such techniques by all archaeologists doing fieldwork anywhere could revolutionize archaeology allowing archaeologists to look inside sites rather than simply excavate them Using a variety of remote sensing techniques Roosevelt documents the existence of a major moundbuilding culture possessing monumental architecture and a rich artistic tradition on the lowland tropical floodplain of Marajo Island at the mouth of the Amazon River in Brazil from about 400 A.D. to about 1,300 A.D. Marajo Island at the mouth of the Amazon River is about the same size as Switzerland or Belgium A well developed civilization existed there from about 400 A.D. to 1,300 A.D. comparable in many ways to the Inca civilization to the west or to the Aztec and Maya cultures to the north or in some interesting ways to the Pharaonic cultures which developed at the mouth of the Nile Because this civilization had no stone at its disposal it expressed its monumental architecture in packed dirt which washed back into the alluvial floodplain long ago effectively preventing archaeological discovery until the recent development of sophisticated techniques of remote sensing and reconstruction Key Features Reports on the most extensive stratigraphic excavations ever of an ancient Amazonian civilization adapted to a floodplain environment Introduces the first use of geophysics for archaeology in non-specialized language Illustrates for the

first time the elaborate art of a complex society that was indigenous to the tropical lowlands Describes monumental sites rich polychrome pottery and the first extensive biological remains ever recovered in an Amazonian site Proves that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Shows that the comprehensive use of such methods could revolutionize archaeology by allowing archaeologists to look inside sites rather than simply excavate them Provides examples which prove that the theories about the limitations of the tropical environment for cultural evolution are simply untrue and were based on faulty knowledge of the region and its archaeology
