

**Roth 10e NCLEX
Chapter 12**

MULTIPLE CHOICE

1. The mother of an infant child asks the nurse what the right feeding schedule is for an infant. Of the following responses, which would be the best response for the nurse to make?
- Feed the infant every 2 hours.
 - Feed the infant every 3 hours
 - Feed the infant every 4 hours
 - Feed the infant when the infant is hungry.

ANS: D

Although babies have been fed according to prescribed time schedules in the past, it is preferable to feed babies on demand. Feeding on demand prevents the frustrations that hunger can bring and helps the child develop trust in people. The newborn may require more frequent feedings, but normally by the time the baby is 2 or 3 months old, the demand schedule averages approximately every 4 hours.

PTS: 1

REF: Introduction

2. The parents of an infant tell the nurse that they are concerned that their healthy breastfed infant is not getting enough fluid from breast milk alone. What could the nurse say about the infants' need for fluids?
- Babies require 2 ml of water per calorie consumed.
 - Give the baby a bottle with 10 ml of water 4 times a day.
 - Offer the baby water in a bottle frequently and let the baby drink ad libitum.
 - The ratio of water to calories in breast milk is ideal for the infant.

ANS: D

Infants have more water per pound of body weight than do adults. Thus, infants usually need 1.5 ml of water per calorie. This is the same ratio of water to calories found in human milk and in most infant formulas.

PTS: 1

REF: Nutritional Requirements

3. The parents bring a two month infant in who has had frequent ear infections. The baby is being fed formula from a bottle. The nurse knows that feeding position may affect development of ear infections. How should the nurse say the infant should be positioned for feeding?
- in a semi upright position
 - lying flat
 - on its side
 - propped up in a chair

ANS: A

It appears that babies held in a semi-upright position during bottle feeding are less inclined to develop middle ear infections than those fed lying down.

PTS: 1

REF: Bottle Feeding

4. A client tells the nurse that formula is very expensive and wants to know when the infant can be given regular cow's milk. What is the best response for the nurse to make?
- at 6 months of age
 - at 12 months of age
 - at 18 months of age
 - at 24 months of age

ANS: B

Infants under 1 year of age should not be given regular cow's milk.
