

Part I: Pressure

1. Use the "Pressure" tab.
2. Open the faucet to fill the well to the top.
3. Bring the pressure gauge and the ruler as shown in image below:

4. Notice that at the top of the well, the pressure gauge should read about 101 kPa (101.4 kPa in my case). Why is this expected?
5. Taking the top of the well to be Zero depth, we now start bringing the pressure gauge under water and record the reading in the following table.

Depth, h (m)	δh (m)	Pressure, P (kPa)	δP (kPa)	Pressure, P (Pa)	δP (Pa)
0	0.02	101.4	0.1	101400	100

Answer Key To Phet Fluid:

The Explore-Before-Explain Guidebook for Science Education Patrick Brown, 2025-06-30 This guidebook uses an Explore before Explain instructional sequence to help you facilitate the design of active meaning making lessons in science. Author Pat Brown models and breaks down how an Explore before Explain approach ensures students' conceptual understandings are constructed primarily on evidence-based experiences in the classroom. From prompting students to ponder patterns helping them identify cause and effect relationships to focusing on development of their thinking rather than validating ideas, you can use Explore before Explain instruction to help your students feel confident in their thinking and become more self-directed learners. Chapters focus on developing your students' conceptual science understanding through the investigation of natural occurrences. Content and module examples are provided as well as attention to contemporary standards and safety in science. Rather than acting as a prescriptive program, however, this book adds another element to your curriculum design showing how lessons can and should include critical elements of active sensemaking when designing an Explore before Explain sequence. In addition, the author shows the benefits of bringing Explore before Explain outside the classroom to create high-quality professional and curriculum-based learning. This resource is ideal for K-12 science teachers as well as building administrators who are looking for a practice-oriented and research-based approach for their science curriculum. As a classroom educator, you can use these strategies for leveraging research into hands-on, minds-on activities to promote more robust and equitable learning environments. For leaders, this resource can be used to develop professional learning experiences for sustained departmental improvement.
