A. Abutalib,Maurie Markman,2014-06-16 The field of oncology benefits from several large scale reference books and a host of
monographs dedicated to specific cancers However truly excellent practice and review books are surprisingly quite scarce
Outside of a scant handful of books and online reference tools that offer clinical response practice and board review in a
basic question and answer format there are no resources that offer a robust engaging fully referenced tool for these vital
activities in every oncologist s and oncology trainee s work This print and electronic book seeks to fill that void offering
comprehensive question and answer style content that covers the entire specialty of oncology and provides practicing
oncologists with a fascinating and immediately applicable compendium of vital information dealing with a well balanced
selection of common and uncommon cancers At the heart of this book is the editor s and authors desire to overcome the
controversies and barriers to practice that usually emerge following the appearance of new data In every section the user is
guided toward collaboration in ongoing clinical research for example via discussions of well designed ongoing clinical trials
in each specific area Developed with both the teacher and learner in mind this book also offers trainees and fellows an
excellent opportunity to enhance their preparation for the ABIM oncology fellowship exam as well as for the oncology boards
It will also be an extremely useful tool for oncologists working toward the recertification exam This comprehensive beefy
book includes hundreds of painstakingly developed multiple choice and mini case based questions covering the principles of
medical oncology malignant hematology surgical oncology and radiation oncology It also contains mini cases and questions
dealing with the biology diagnosis classification staging and multidisciplinary treatment of cancers at every anatomic site The
very latest topics are included such as molecular techniques targeted therapies and translational cancer research Concise
but detailed answers are referenced to key journals and books and evidence based wherever possible NCCN guidelines are
also referenced as appropriate With its powerful focus on take home messages from and for actual clinical work this book will
help keep oncologists up to date bridging the gaps between journal and reference literature conferences and their existing
