Defense Logistics Studies Information Exchange,1981 A Guide to Federal Terms and Acronyms Don Philpott,2017-12-20 Navigating government documents is a task that requires considerable knowledge of specialized terms and acronyms This required knowledge nearly amounts to knowing a completely different language To those who are not fluent the task can be overwhelming as federal departments fill their documents with acronyms abbreviations and terms that mean little or nothing to the outsider Would you be able to make sense of a document that described how the COTR reports to the CO regarding compliance with FAR GPRA SARA and FASA This is a common procedure in government contracting Would you have any clue what was being referred to if you came across MIL STD 129P It is the new standard for Military Shipping Label Requirements The sheer number of such terms makes mastering them nearly impossible But now these terms and their definitions are within reach This new edition of *A Guide to Federal Terms and Acronyms* presents a glossary of key definitions used by the federal government It is updated to include new acronyms and terminology from various federal government departments It covers the most common terms acronyms and abbreviations used by each major agency presenting definitions and explanations in a user friendly and accessible way This is an essential tool for anyone who works with federal government information **The 1982 Guide to the Evaluation of Educational Experiences in the Armed Services** American Council on Education,1982 *Moody's Industrial Manual* ,1997 Covering New York American regional stock exchanges international companies *Commerce Business Daily* ,1999-03 **A Guide to the Evaluation of Educational Experiences in the Armed Services** American Council on Education,1984 **National Union Catalog** ,1956 Includes entries for maps and atlases **The United States Army** Peter Tsouras,Bruce W. II Technical Manual** War Department,2013-05-01 The Landing Vehicle Tracked LVT was a class of amphibious warfare vehicle a small landing craft introduced by the United States Navy Marine Corps and Army during World War II Originally intended solely as cargo carriers for ship to shore operations they rapidly evolved into assault troop and fire support vehicles as well The LVT Mark I was the first military model Traveling at a respectable six knots in the water and twelve mph on land it could deliver twenty four fully equipped assault troops to the beach Though it was only intended for delivering supplies inland until wheeled vehicles could be brought ashore the LVT could supply supporting fire from two 30 cal M1919 Browning machine guns Many

LVTs were refitted prior to the Tarawa landing to hold two 50 cal Browning heavy machine guns forward with the 30 cal guns aft. The vehicle was not armored and its thin steel hull offered virtually no protection although prior to Tarawa some vehicles received nine mm of armor plating to the cab. The LVT's tracks performed well on sand but not on tough surfaces. The rigid suspension threw tracks and roller bearings corroded in salt water. Proper maintenance of the new machine was often an issue as few Marines were trained to work on it and early models suffered frequent breakdowns. The LVT Mark II featured new powertrain and torsilastic suspension. The aluminium track grousers were bolted on making changes much easier since they wore out quickly on land and more so on coral. Hard terrain performance was much better compared to the LVT Mark I. Created in 1944 this technical manual reveals a great deal about the LVT's design and capabilities. Intended as a manual for those charged with operation and maintenance it details many aspects of its engine cooling fuel powertrain and other systems. Originally labeled restricted this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.
