An Architecture for Combinator Graph Reduction Philip John Koopman,2014-05-12 An Architecture for Combinator Graph Reduction examines existing methods of evaluating lazy functional programs using combinator reduction techniques implementation and characterization of a means for accomplishing graph reduction on uniprocessors and analysis of the potential for special purpose hardware implementations Comprised of eight chapters the book begins by providing a background on functional programming languages and existing implementation technology Subsequent chapters discuss the TIGRE Threaded Interpretive Graph Reduction Engine methodology for implementing combinator graph reduction the TIGRE abstract machine which is used to implement the graph reduction methodology the results of performance measurements of TIGRE on a variety of platforms architectural metrics for TIGRE executing on the MIPS R2000 processor and the potential for special purpose hardware to yield further speed improvements The final chapter summarizes the results of the research and suggests areas for further investigation Computer engineers programmers and computer scientists will find the book interesting An architecture for combinator graph reduction Philip John Koopman (Jr),1989 **Dissertation Abstracts International** ,1989 **The American Mathematical Monthly** ,1991 Bibliographic Guide to Computer Science ,1991 **American Doctoral Dissertations** ,1988 **Handbook of Logic in Artificial Intelligence and Logic Programming: Volume 5: Logic Programming** Dov M. property The operational semantic model uses indirection nodes to implement sharing An alternative which is without indirection nodes is shown to be operationally equivalent for terminating programs The G machine is shown to be a representation of the combinator graph reduction operational model It may be represented by the composition of a small set of combinators which correspond to an abstract machine instruction set Using a modified form of graph isomorphism alternative sequences of instructions are shown to be isomorphic and hence may be used interchangeably
