Ingenious Yankees Donald Hoke,1984 [Beating Plowshares Into Swords](#) Paul A. C. Koistinen,1996 Koistinen describes how an undeveloped preindustrial economy forced Americans to fight defensive wars of attrition like the Revolution and the War of 1812 By the time of the Mexican War however a gradually maturing economy allowed the United States to use a much more offensive minded strategy to achieve its goals The book concludes with an exhaustive examination of the Civil War a conflict that both anticipated and differed from the total wars of the industrialized era Koistinen demonstrates that the North relied upon its enormous economic might to overwhelm the Confederacy through a strategy of annihilation while the South bungled its own strategy of attrition by failing to mobilize effectively a much less developed economy **The Rise and Fall of Mass Production** Steven Tolliday,1998 This important collection presents in two volumes the most significant papers on the history of mass production and highlights crucial debates in the attempt to understand the phenomenon and its social and economic effects The selection focuses on six important themes Volume I opens with an exploration of the antecedents to mass production and an investigation of the mechanical economic and social

roots of the transformation in production methods at the beginning of the 20th century The following section examines the emergence of Fordism and the fundamental elements of the new system The final section describes the extent to which mass production has spread through the wider economy and the ways in which it has changed in the process In Volume II the first section covers the impact of mass production on work and the workers The second section looks at how Japan has exploited the principles of mass production and may indeed have evolved a new form of productive organisation The concluding section raises the question of whether in the late 20th century the dominance of mass production is in decline
