John Salvia, James E. Ysseldyke, 1998 Putting Library Assessment Data to Work Selena Killick, Frankie Wilson, 2019-07-16

Effective library assessment is crucial for a successful academic library. But what do we mean by library assessment and how can it be used to improve the library service? This new book provides a practical guide for library administrators, managers and practitioners on how to make effective use of existing sources of information for assessment activities with the aim of improving academic library services. Putting Library Assessment Data to Work brings together key library assessment methodologies detailing how they can be used to improve an academic library. The book takes common sources of data that academic libraries will already be collecting and presents simple qualitative and quantitative techniques that can be used to evaluate and assess their services both in detail and overall. The different assessment methods are presented from a practical perspective with a theoretical grounding and include practical case studies to illustrate how the methodologies have successfully been applied. The book includes coverage of the theoretical framework for assessment, its purpose and the tools and techniques used. Institutional, national and international student surveys and how they can be used to improve library service. The history and development of standardised library surveys eg LibQUAL and how they have been used and their impact. The benefits of in-house library surveys and case studies of where they have been used. Library statistics including standardised statistics sets and key performance indicators. Qualitative feedback in the library. Emerging techniques including UX. Taking a holistic approach to library assessment through advocacy and strategic planning. This book will be essential reading for library and information service managers, administrators, assessment practitioners, educators and policy shapers. It will also be useful for students and researchers interested in library assessment.

Assessment Education Beth Tarasawa, Amelia Gotwals, Cara Jackson, 2020-09-01. Using assessment systems to improve student outcomes requires shared understanding and collaboration among education stakeholders at multiple levels. *Assessment Education: Bridging Research Theory and Practice to Promote Equity and Student Learning* presents a powerful call to action for an assessment system that advances equity and offers educators practical applications that promote sound instructional decision making. Each section outlines a research-based approach that supports classroom teaching and student learning. We then draw on the expertise of various education leaders, most notably members of the National Taskforce on Assessment Education, to provide case studies of on-the-ground examples of what these strategies look like in different settings. Every chapter includes stories from the field from various perspectives: teachers, principals, district administrators and other educational leaders. We conclude with reflection questions that provide an opportunity for readers to examine how the chapter connects to their own context.
