Amgen Biotech Experience Student Guide:

A Practical Guide to Drug Development in Academia Daria Mochly-Rosen, Kevin Grimes, 2023-11-06 A lot of hard won knowledge is laid out here in a brief but informative way. Every topic is well referenced with citations from both the primary literature and relevant resources from the internet. Review of first edition from *Nature Chemical Biology*. Written by the founders of the SPARK program at Stanford University this book is a practical guide designed for professors, students and clinicians at academic research institutions who are interested in learning more about the drug development process and how to start transforming their basic research discoveries into novel drugs. Often many potentially transformative basic science discoveries are not pursued because they are deemed too early to attract industry interest. This comprehensive book lays out simple, relatively cost effective things that academic researchers can do to advance their findings to the point that they can be tested in the clinic or attract more industry interest. Each chapter broadly discusses an important topic in drug development from discovery optimization and preclinical studies through clinical trial design, regulatory issues and marketing assessments. After the practical overview provided here, the reader is encouraged to consult more detailed texts on specific topics of interest. The SPARK model has been adopted in over 60 institutions on six continents and the program has been honored with multiple awards including the 2020 Xconomy Award for Ecosystem Development, the 2020 Cures Within Reach Award for Patient Impact Research and the 2022 California Life Sciences Pantheon Award for Academia Non Profits Research. The new edition updates every chapter with the latest developments since the 2014 publication of the first edition.

New for 1997: Non-degree granting research centers, institutes and training programs that are part of a graduate degree program. Five discipline-specific volumes detail entrance and program requirements, deadlines, costs, contacts and special options such as distance learning for each program, if available. Each Guide features The Graduate Adviser, which discusses entrance exams, financial aid, accreditation and more. The only source that covers nearly 4,000 programs in such areas as oncology, conservation biology, pharmacology and zoology.
