

# AMSCO EAGLE 3000 MEDIUM AUTOCLAVES

## DESCRIPTION

Eagle 3000 Stage 3™ Series Sterilizers feature an advanced micro-computer control system, providing latest standard for cycle setup, selection and monitoring. Once settings are made and cycle is started, micro-computers accurately monitor and control system operations. Control column includes an easy-to-read vacuum fluorescent display and an integral thermal printer.

Eagle 3000 Stage 3™ Series Sterilizers can be used in a hospital or laboratory and offer a choice of two configurations:

- Gravity—for sterilizing liquids, in flasks with vented closures, at 250° F (122° C), and also heat- and moisture-stable goods at 270° F (132° C).

- Vacumatic—for efficient, high-volume processing of heat and moisture-stable materials, such as fabrics, wrapped hard goods, glassware or animal bedding at 270° F (132° C) through pre-vacuum cycle. Vacumatic also provides gravity-type cycles.

Gravity units operate by the gravity downward displacement air removal principle. Vacumatic sterilizers have a mechanical air evacuation system for high-speed, high-volume sterilization. Both types use steam-under-pressure as the sterilizing agent. Sterilizers are furnished ready for connection to building steam supply.

Typical only — some details may vary
