

An Idea For Murder

Pierre Manent

An Idea For Murder:

The City of Man Pierre Manent,1998 The City of God or the City of Man This is the choice St Augustine offered 1500 years ago and according to Pierre Manent the modern West has decisively and irreversibly chosen the latter In this subtle and wide ranging book on the Western intellectual and political condition Manent argues that the West has rejected the laws of God and of nature in a quest for human autonomy But in declaring ourselves free and autonomous he contends we have paradoxically lost a sense of what it means to be human In the first part of the book Manent explores the development of the social sciences since the seventeenth century portraying their growth as a sign of increasing human self consciousness But as social scientists have sought to free us from the intellectual confines of the ancient world he writes they have embraced modes of analysis economic sociological and historical that treat only narrow aspects of the human condition and portray individuals as helpless victims of impersonal forces As a result we have lost all sense of human agency and of the unified human subject at the center of intellectual study Politics and culture have come to be seen as mere foam on the tides of historical and social necessity In the second half of the book titled Self Affirmation Manent examines how the West having discovered freedom then discovered arbitrary will and its dangers With no shared touchstones or conceptions of virtue for example we have found it increasingly hard to communicate with each other This is a striking contrast to the past he writes when even traditions as different as the Classical and the Christian held many of these conceptions in common The result of these discoveries according to Manent is the disturbing rootlessness that characterizes our time By gaining autonomy from external authority we have lost a sense of what we are In giving birth to ourselves we have abandoned that which alone can nurture and sustain us With penetrating insight and remarkable erudition Manent offers a profound analysis of the confusions and contradictions at the heart of the modern condition

John Locke's Politics of Moral Consensus

Greg Forster,2005-02-07 The aim of this book is twofold to explain the reconciliation of religion and politics in the work of John Locke and to explore the relevance of that reconciliation for politics in our own time Confronted with deep social divisions over ultimate beliefs Locke sought to unite society in a single liberal community Reason could identify divine moral laws that would be acceptable to members of all cultural groups thereby justifying the authority of government Greg Forster demonstrates that Locke's theory is liberal and rational but also moral and religious providing an alternative to the two extremes of religious fanaticism and moral relativism This account of Locke's thought will appeal to specialists and advanced students across philosophy political science and religious studies
