Paradox and the Possibility of Knowledge Jeremy Barris, 2003

Paradox and the Possibility of Knowledge argues that psychoanalytic theory has certain mostly unnoticed features that bring out with unusual clarity a logic that is true of conceptual thought generally. This logic is paradoxical in that it is deliberately and productively self-canceling. The general relevance of this logic to conceptual thought and to theory offers a solution to some fundamental epistemological problems. First it allows a solution to the problem of the ultimate circularity or infinite regress of knowledge by showing how the circle or regress eliminates itself in a variety of successful knowledge grounding ways. Second it offers some resulting insights into issues involving politically troublesome dimensions of knowledge specifically into the procedure of ethical political dialogue. The book is written in the contexts of both Anglo American philosophy and Continental or European philosophy. The argument is largely Wittgensteinian and at the same time proceeds through detailed reference to Freud's and Lacan's work. On the way it addresses theory construction in general including the claims of phenomenology and deconstruction.

Workouts for Stepping into Emotionally Focused Therapy Lorrie L. Brubacher, 2024-10-03. Workouts for Stepping into Emotionally Focused Therapy is a companion to Stepping into Emotionally Focused Therapy: Key Ingredients of Change, 2nd ed. Inspired by Deliberate Practice, it is filled with exercises called workouts, first with couples EFT followed by a series of workouts in that same skill or move with individuals EFT. The workouts are more than skill drills. They are clear, tangible ways for the reader/practitioner to become emotionally engaged within self and in attunement with each client scenario and to strengthen their EFT muscles with the practice of each of these EFT ingredients of change. Part 1 includes workouts of ten micro skills across a wide range of client scenarios including diversity of racial/ethnic gender sexual orientation religious neurodiversity and other contextual diversity. Workouts with the five moves of the EFT Tango from beginning of therapy to the completion of Stage 2 change first with a couple and then with an individual make up Part 2. The reader/practitioner has opportunity in Part 3 to apply the macro intervention to Stages 1 and 2 change in their own lives to explore barriers to following and deepening emotions and to utilize a series of antidotes for typical EFT therapist challenges and goal setting. Containing practical handles for the new clinician or graduate student wanting to integrate EFT into their practice, it is also stimulating and relevant for seasoned therapists and counselors seeking to sharpen EFT skills and develop confidence in the model with both couples and individuals.
