

# DISTRIBUTIVE PROPERTY

The **distributive property** is a fundamental rule in algebra that describes the relationship between multiplication and addition or subtraction. For three numbers  $a$ ,  $b$ , and  $c$ , the distributive property establishes that:

$$(a \times b) + c = (a \times b) + (a \times c)$$

This property allows for expanding and simplifying algebraic expressions, facilitating calculations and manipulations. It is essential in solving equations and in algebra overall, providing a key tool for working with algebraic terms.

**Basic Algebra and Geometry Made a Bit Easier Lesson Plans** Larry Zafran, 2010 This is the fifth book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It contains 50 abridged lesson plans covering basic algebra and geometry for a target audience of tutors, parents, and homeschoolers. Each lesson plan includes all of the components of a typical classroom lesson such as aim, motivation, warm up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. This book is intended to be used in strict conjunction with the fourth book of the series, Basic Algebra and Geometry Made a Bit Easier: Concepts Explained in Plain English. The book assumes that the instructor actually knows the material him/herself but could benefit from having a general guideline to follow. The author makes a point of identifying the concepts which most students tend to find easy or difficult, including suggestions on how to help with the latter. The book includes an introduction describing how the book can be put to best use as well as a section on how to effectively work with students who are struggling with the material. The author explains that for the vast majority of students, the root of the problem can be traced back to never having fully mastered basic math concepts and skills. The book's lessons make frequent reference to reviewing earlier books in the series as needed so that the student masters all of the prerequisite material.

**Math Made a Bit Easier Lesson Plans** Larry Zafran, 2010-01-19 This is the third book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It is a book of sixty lesson plans for tutors, parents, and homeschoolers. Each lesson plan includes all the components of a typical classroom lesson such as aim, motivation, warm up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. The math content in this book is directly aligned and ideally used in conjunction with the first book of the series and its companion workbook of practice exercises. It covers the topics which comprise the foundation of math, beginning with lessons in basic arithmetic followed by basic operations, negative numbers, fractions, decimals, percents, and basic probability and statistics. If these topics are not completely mastered, later work will prove to be quite difficult. This is especially true of algebra. The book includes a chapter on how to be an effective math tutor as well as a chapter on how to optionally incorporate meditation instruction to help students get into a relaxed and alert state of mind which is ideal for learning math and taking exams.
