Sociolinguistics J. B. Pride, Janet Holmes, 1972 *Sociolinguistics*, 1971 Sociolinguistic Metatheory E.

Figuerola, 2014-06-28 Linguistics is a discipline with ever expanding boundaries and interests. Despite the narrow definition of linguistics which dominates academia, sub fields continue to flourish and ways of doing linguistics continue to expand. As ways to do linguistics increase and as approaches to linguistics accumulate over time, it becomes increasingly necessary for students of linguistics to have ways of understanding and comparing developments in linguistics. Sociolinguistic Metatheory is a book which explains foundational developments in linguistics by taking the past three decades of developments in sociolinguistics and relating them to contemporaneous developments in received linguistics. Sociolinguistic Metatheory takes the reader through the basic philosophical questions which drive linguistic research. It looks in detail at three models of sociolinguistics: Dell Hymes and the Ethnography of Communication, William Labov and Sociolinguistic Realism, and John Gumperz and Interactional Sociolinguistics, and focuses on such questions as: Where is language located? How is an utterance based approach to linguistics different from a sentence based approach? How do metatheoretical paradigm assumptions such as realism or relativism affect the development of linguistic theory? What interesting developments in linguistic theory and analysis have sociolinguistics provided?

Social Lives in Language--sociolinguistics and Multilingual Speech Communities Gillian Sankoff, Miriam Meyerhoff, Naomi Nagy, 2008. This volume offers a synthetic approach to language variation and language ideologies in multilingual communities. Although the vast majority of the world's speech communities are multilingual, much of sociolinguistics ignores this internal diversity. This volume fills this gap, investigating social and linguistic dimensions of variation and change in multilingual communities. Drawing on research in a wide range of countries: Canada, USA, South Africa, Australia, Papua New Guinea, Solomon Islands, Vanuatu, it explores connections between the fields of creolistics, language dialect contact, and language acquisition, how the study of variation and change, particularly in cases of additive bilingualism, is central to understanding social and linguistic issues in multilingual communities, how changing

language ideologies and changing demographics influence language choice and or language policy and the pivotal place of multilingualism in enacting social power and authority and a rich array of new empirical findings on the dynamics of multilingual speech communities **World Englishes** Kingsley Bolton, Braj B.
