**Structure, Evidence, and Heuristic** Armin W. Schulz, 2020-04-22 This book is the first systematic treatment of the philosophy of science underlying evolutionary economics It does not advocate an evolutionary approach towards economics but rather assesses the epistemic value of appealing to evolutionary biology in economics more generally The author divides work in evolutionary economics into three distinct albeit related forms a structural form an evidential form and a heuristic form He then analyzes five examples of work in evolutionary economics falling under these three forms For the structural form he examines the parallelism between natural selection and economic decision making and the parallelism between natural selection and market competition For the evidential form he looks at the relationship between animal and human economic decision making and the evolutionary explanation of diversity in human economic decision making Finally for the heuristic form he focuses on the plausibility of equilibrium modeling in evolutionary ecology and economics In this way he shows that linking evolutionary biology and economics can make for a powerful methodological tool that can enable progress in our understanding of various economics questions Structure Evidence and Heuristic will be of interest to scholars and advanced students working in philosophy of science philosophy of social science evolutionary biology and economics

**Replacing Darwin** Nathaniel T Jeanson, 2017-09-01 If Darwin were to examine the evidence today using modern science would his conclusions be the same Charles Darwin's *On the Origin of Species* published over 150 years ago is considered one of history's most influential books and continues to serve as the foundation of thought for evolutionary biology Since Darwin's time however new fields of science have emerged that simply give us better answers to the question of origins With a Ph D in cell and developmental biology from Harvard University Dr Nathaniel Jeanson is uniquely qualified to investigate what genetics reveal about origins *The Origins Puzzle Comes Together* If the science surrounding origins were a puzzle Darwin would have had fewer than 15% of the pieces to work with when he developed his theory of evolution We now have a much greater percentage of the pieces because of modern scientific research As Dr Jeanson puts the new pieces together a whole new picture emerges giving us a testable predictive model to explain the origin of species *A New Scientific Revolution Begins* Darwin's theory of evolution may be one of science's sacred cows but genetics research is proving it wrong Changing an

entrenched narrative even if it s wrong is no easy task Replacing Darwin asks you to consider the possibility that based on genetics research our origins are more easily understood in the context of In the beginning God with the timeline found in the biblical narrative of Genesis There is a better answer to the origins debate than what we have been led to believe Let the revolution begin About the Author Dr Nathaniel Jeanson is a scientist and a scholar trained in one of the most prestigious universities in the world He earned his B S in Molecular Biology and Bioinformatics from the University of Wisconsin Parkside and his PhD in Cell and Developmental Biology from Harvard University As an undergraduate he researched the molecular control of photosynthesis and his graduate work involved investigating the molecular and physiological control of adult blood stem cells His findings have been presented at regional and national conferences and have been published in peer reviewed journals such as Blood Nature and Cell Since 2009 he has been actively researching the origin of species both at the Institute for Creation Research and at Answers in Genesis
