The Macroeconomics of Fiscal Policy Richard W. Kopcke, Geoffrey Matthew Bemis Tootell, Robert K. Triest, 2006 Leading academics and former policy makers assess the effectiveness of postwar American fiscal policy as questions about the role of fiscal policy once again come to the forefront of economic research and debate The United States s post World War II emphasis on activist fiscal policy for short term economic stabilization was called into question in the 1960s and by the late 1980s was superseded by the view that fiscal policy should focus on long run structural concerns For the past two decades both public policy and economic research emphasized monetary policy as a stabilization tool But there remain issues in American macroeconomic policy having to do with budget deficits present and projected as well as a recent revival of interest in fiscal policy as a stabilization tool Overall the academic pendulum is swinging back towards a renewed consideration of fiscal policy This volume brings together leading researchers and policy makers to assess the effectiveness and consequences of fiscal policy Drawing on postwar policy experience and recent economic research this book offers a state of the art consideration of where fiscal policy stands today Contributors address both the appropriateness of fiscal policy as a tool for short run macroeconomic stabilization and the longer term impact of fiscal decisions and economic policy Topics covered include the legacy of the Reagan administration s tax cuts whether public policy has encouraged such behavior as overconsumption which may foster persistent budget and trade deficits and in light of recent experience how and when fiscal policy might be appropriate as a short term stabilization tool Contributors Alan J Auerbach Susanto Basu Olivier J Blanchard Alan S Blinder Barry P Bosworth W Elliott Brownlee William H Buiter Jonathan Coppel Jean Philippe Cotis Luiz de Mello James S Duesenberry Douglas W Elmendorf Eric Engen Jeffrey A Frankel Benjamin M Friedman Richard W Kopcke Catherine L Mann Van Doorn Ooms Rudolph G Penner Alice M Rivlin Christopher A Sims C Eugene Steuerle Geoffrey M B Tootell Robert K Triest Edwin M Truman

Just Security in an Undergoverned World William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity s very success underwritten in large part by

lighting up gigatons of long buried carbon for 200 years now threatens humanity's future. The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members. Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies. This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors. It offers just security as a new framework for charing innovating solutions and strategies for effective and essential global governance.

The economic impact of FinTech companies on the traditional banking sector and possible future scenarios Malik Dakdaki, 2017-11-07 Bachelor Thesis from the year 2017 in the subject Business economics Accounting and Taxes grade 1.3 University of applied sciences Frankfurt a M FOM language English abstract The beginning of the digital revolution at the turn of the millennium has ushered in a structural change in many sectors. Due to the increased use of modern information and communication technologies ICT several sectors have already experienced existential economic implications. This is especially evident in the music media and publishing industries. For example music is not only purchased on CDs from local retail stores but is also increasingly consumed via the Internet through streaming services such as Spotify. Videos store rentals compete with the comfortable video on demand services available in customers own homes. The Internet as a medium for information and consumption for products and services has established itself as a faster more comfortable and more efficient channel in comparison to traditional sales channels. Stationary retail stores were also not spared from digital disruption. The market research institute Gesellschaft f r Konsumforschung GfK predicts a doubling of the online share of retail sales from currently to 20% by the year 2025. At the same time new and innovative market participants known as financial technology or FinTech companies are edging into the financial sector and trying to gain market share from established banks through customer friendly products and services. Nevertheless the banks do not seem to recognize the seriousness of the situation and therefore are reluctant to adapt to the new situation. However experience has shown that ignorance of an industry's digitization has already led to the fall of large and established companies. As a well known example in the technology industry Kodak is often referred to in this context. The company's reaction to the digital disruption took place too late whereas other companies had already recognized the trend towards digital photography at an earlier stage and prepared corresponding products. As a result Kodak plummeted from the top of the photography technology industry. Evidence of ongoing digital disruption of the financial services sector has already been provided in the form of a new type of bank the direct bank which was first introduced in the early 1990s. FinTech companies seek to take advantage of this success and gain customers and market share by offering innovative solutions for financial products and services.
