insist that legal equality for women and healthy partnerships between women and men are also essential components to enduring transformation of their societies Moore theorizes what peacebuilding look like if it were modeled on these women led matriarchically structured communities that proved not only to be effective at holding governments accountable but also to have the capacity to feed their people and revitalize their local economies Women s Work shows that when women have full socioeconomic citizenship as well as equitable and respectful partnerships with men transformative justice can be sustained through the arts of collective livelihood violence free conflict management and celebration *National Journal* ,2000

**Politics and International Relations in Eurasia** Stylianos A. Sotiriou,2019-03-28 Eurasia has long been characterized

by intense competition among populations and among States The collapse of the Soviet Union constituted a critical juncture in the region's course since informal and formal norms subsided giving rise to a hardly regulated socio political environment where survival and security considerations ranked atop In this context populations first and foremost sought to have their existence guaranteed within nation states While in most cases that transition was accomplished without major impediments in the cases of Moldova Ukraine Georgia and Azerbaijan major challenges have been encountered leaving their mark deep in the post soviet course of the newly independent republics Moldova has been rattled by the conflict in Transdniestria Ukraine by the conflict in Crimea Georgia by the conflict in South Ossetia and Abkhazia and Azerbaijan by the conflict in Nagorno Karabakh In fact these conflicts have been classified as frozen conflicts given their unsettled nature and the smoldering fire between opposing populations within the respective republics This intense competition however has not been constrained only to the domestic level and only to the issue of frozen conflicts Eurasia's energy prospects have also been the cause of a constant power struggle among the States of the region With the Caspian Sea to constitute a rich in natural resources hub a clash of interests has taken place among the littoral States Moreover this competition has acquired a much broader geopolitical dimension extending to Eurasia's two ends the European Union and China As a result Eurasia's underbelly has become an area where the maximization of power figures as the best guarantee of survival and security in a fully unregulated environment Taken together frozen conflicts domestic level and energy politics international level stand out as the two main features of Eurasia both unfolding in comparable conditions Therefore the book presents them as a two level game aiming at offering better substantiated explanations that draw on the very fundamentals of political science and at building a bridge of communication between the two levels that allows for well informed and widely applicable policy implications
