

APICS CPIM Exam 1 Questions & Answers 2024/2025

ABC classification - ANSWERSProcess of classifying items in descending order based on annual dollar volume or some other criteria. The list is then split into 3 classes - A, B, and C. A represents 10-20% of items but 50-70% of dollar volume; B represents 20% of items and 20% of dollar volume; C represents 60-70% of items but 10-30% of dollar volume. This principle states that effort and money can be saved by applying looser controls to the low dollar volume items (C class) than the higher dollar volume items (A & B classes) and applies to inventory, purchasing, sales, etc.

Assemble-to-order - ANSWERSProduction environment where a good or service can be assembled after receipt of a customer's order. Useful strategy when a large number of end products can be assembled from common components.

Available inventory - ANSWERSOn-hand inventory balance minus allocations, reservations, backorders, and quantities held for quality problems.

Backflush - ANSWERSMethod of inventory bookkeeping where the book inventory is automatically reduced after completion of activity on component's upper-level parent item based on what should have been used as specified on the BOM and allocation records; disadvantage is difference between book inventory and physical OH inventory.

This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia NEA defined as the region north of the Yellow River and east of the Yenisei In particular it analyzes what is called the grammar of questions GQ i.e. those aspects of any given language that are specialized for asking questions or regularly combine with these The bulk of the study is a bottom up description and comparison of GQs in the languages of NEA The addition of the phrase and beyond to the title of this study serves two purposes First languages such as Turkish and Chuvash are included despite the fact that they are spoken outside of NEA since they have ties to or even originated in the region Second despite its focus on one area the typology is intended to be applicable to other languages as well Therefore it makes extensive use of data from languages outside of NEA The restriction to one category is necessary for reasons of space and clarity and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples The aim is to achieve both a cross linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia **Production & Inventory Management Review & APICS News**, 1990 **APICS Dictionary** American Production and Inventory Control Society, 2002 **International Journal of Production Economics**, 1997 *International Technical Conference Proceedings* American Production and Inventory Control Society, 1979
