The Earliest English Translation of the First Three Books of the De Imitatione Christi Thomas (a Kempis.),1893

Noah Webster's First Edition of an American Dictionary of the English Language Noah Webster,Foundation for American Christian Education,1989

The Webster's 1828 Dictionary is a unique and essential tool for educating Christians. It has the greatest number of Biblical definitions of any reference. Roots are traced in 26 languages. Usage examples come from classical literature and the Bible. This dictionary becomes not only a tool for defining words Biblically, it becomes a way of thinking that forms your worldview. It will equip you for Christian leadership, strengthen your vocabulary, give you an edge in communicating your view and become your foundation for thinking and reasoning Biblically. This tool can be the turning point for you to be more effective in communicating Christian principles used in government, economics and marketing or for your student to clearly understand how the Bible has influenced every area of life.

Animal Minds in Medieval Latin Philosophy Anselm Oelze, 2021-04-02 This sourcebook explores how the Middle Ages dealt with questions related to the mental life of creatures great and small. It makes accessible a wide range of key Latin texts from the fourth to the fourteenth century in fresh English translations. Specialists and non-specialists alike will find many surprising insights in this comprehensive collection of sources on the medieval philosophy of animal minds. The book's structure follows the distinction between the different aspects of the mental. The author has organized the material in three main parts: cognition, emotions, and volition. Each part contains translations of texts by different medieval thinkers. The philosophers chosen include well-known figures like Augustine, Albert the Great, and Thomas Aquinas. The collection also profiles the work of less-studied thinkers like John Blund, Pseudo Peter of Spain, and Peter of Abano. In addition, among those featured are several translated here into English for the first time. Each text comes with a short introduction to the philosopher, the context, and the main arguments of the text, plus a section with bibliographical information and recommendations for further reading. A general introduction to the entire volume presents the basic concepts and questions of the philosophy of animal minds and explains how the medieval discussion relates to the contemporary debate. This sourcebook is valuable for anyone interested in the history of philosophy, especially medieval philosophy of mind. It will also appeal to scholars and students from other fields such as psychology, theology, and cultural studies.

New Cyclopaedia of Botany and Complete Book of Herbs Richard Brook (Botanist), 1854 Early edition other copies appear under the imprint of Frederick Farrah during the same period. This is a very scarce book which, although cheaply printed on thin paper, also includes some very attractive if unrefined hand-coloured illustrations. The frontispiece depiction of the goddess Flora is particularly weird. The text covers all species of British flora with tips on cultivation and care, but is especially useful in its concise discussion of the medical properties of hundreds of plants. This was clearly intended as a manual for domestic use and the list of diseases that can be treated with home remedies is exhaustive. Antiquarian bookseller's description 2015

A Commentary on the Proverbs John Miller, 1872

Christian Word Book John Sherrell Hendricks, 1969 Christian Word Book is a basic resource for study in the youth ministry of The United Methodist Church. Over 600 terms, phrases, and ideas that have been and are now used by Christians are analyzed and interpreted. Youth and adults who work with them will find this book a constant help in understanding the varied meaning of words from worship.
