From presidents of the United States to presidents of Fortune 500 companies, it is clear that everyone thinks innovation is extremely important. The challenge is that few people stop to define why innovation is important, to understand what's driving the need for more innovation. We all agree that more frequent innovation is important, even necessary. You can use these tools to talk to customers' satisfied ones, unsatisfied ones, potential customers, people who would never buy your product or service, and also people you have never considered as a potential customer. In addition, these tools will help you ask your competitors' customers about what makes them happy with the current businesses and offerings in the industry, why they buy or do not buy from you, your competitors and other industries. These tools will help you understand the steps in the customer journey they need to take, what delights and frustrates them, and what their pain points are. The three volumes of *The Innovation Tools Handbook* cover 76 top rated tools and methods from the hundreds available that every innovator must master to be successful. Covering evolutionary and/or improvement innovative tools and methodologies, Volume 2 presents 23 tools and methodologies related to innovative evolutionary products, processes and services or the improvement of existing ones. For each tool, the book provides a definition, identifies the user of the tool, explains what phases of the innovation process the tool is used, describes how the tool is used, supplies examples of the outputs from the tool, identifies software that can maximize its effectiveness, and includes references and suggestions for further reading.
