Stollorz, 2008-07-03 Ancient calendars found around the world are designed to end one point in time They communicate an urgent warning to everyone alive today Complex bronze and gold clocks with multiple dials are found in museums around the world Why they have such advanced intricacy has stumped scientists for hundreds of years This book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012 It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance The most famous example is the Mayan Aztec calendar which ends its 25 626 year cycle on that momentous date Some researchers have also found 21 December 2012 in what is called the Bible Code Using very different research methods I discovered it in the Bible's book of Revelation and Daniel's prophecies It is one of the most important dates in the plan of God for all humanity *Federal Register*, 2012-05 **The Astronomical Almanac for the Year ...**, 2015 *Internal Revenue Bulletin* United States. bean farmers were reported to be growing an HIB the equivalent of approximately 350 000 households Detailed results of the listing exercise are available in a separate report<sup>3</sup> The second part of the study was a more detailed household survey which was conducted among a subsample of nearly 1 400 bean farming households immediately after harvest had taken place Both the listing and main household survey are nationally representative of rural bean producing households in Rwanda This report presents key descriptive results from the main survey and sheds light on issues that may be investigated further in forthcoming publications Key takeaways from the report are summarized below
