Market and Competition Authorities Annetje Ottow, 2015-03-26 Market and competition authorities operate in a complex environment with conflicting stakeholder demands. Balancing the various interests of the authority and stakeholder in an objective and impartial manner is strategic to achieving the goals of the legislation imposed. In a fresh approach examining the actions of an authority when a regulation is applied, Annetje Ottow argues the vital importance of the behaviour of authorities focusing on five fundamental good agency principles: legality, independence, transparency, effectiveness, and responsibility. LITER: These principles provide agencies and those reviewing their actions with a framework for agency design and action. Combining theory and practice to provide insight into agencies' organization and behaviour, this book outlines and analyses behavioural issues using an ecosystemic method, addressing how independent agencies should be assessed and which principles should apply. Using cases from the Netherlands and the UK, Ottow examines the key processes of authorities against the LITER principles and opens the debate on how to regulate the agency. **Outward Foreign**

Direct Investment in ASEAN Cassey Lee, 2017-02-15 The level of outward foreign direct investment (OFDI) flows from ASEAN countries has increased rapidly in past two decades. This book examines OFDI trends and patterns in the ASEAN region, including the impact of the ASEAN Economic Community. It also provides analyses of country policies affecting OFDI and the drivers of OFDI in Indonesia, Malaysia, Singapore, and Vietnam. Myanmar is studied as an investment frontier for other ASEAN countries. The dynamic economies of Southeast Asia have historically been very large recipients of foreign direct investment (FDI). As global capital markets have opened up and these economies have developed their technological and commercial capabilities in more recent years, Southeast Asia has emerged as a significant source of outward FDI both within the region and beyond. This important volume by a group of leading regional scholars offers a timely, comprehensive, accessible, and authoritative analysis of this phenomenon. Hal Hill, H. W. Arndt, Professor of Southeast Asian Economies, Arndt Corden Department of Economics, Crawford School of Public Policy, Australian National University. A timely, rich, and comprehensive study filling a major gap in the literature on the increasingly important phenomenon of foreign investment flowing out from regions including developing and middle income countries. Luke Nottage, Professor of Comparative and Transnational Business Law, Associate Director, Centre for Asian and Pacific Law at the University of Sydney. *Business Publication Advertising Source*, 1999-02. Inge Bekkevold, S. Kalyanaraman, 2020-12-22 This book examines India's foreign and defence policy changes in response to China's growing economic and military power and increased footprint across the Indo-Pacific. It further explores India's role in the rivalry between China and the United States. The book looks at the strategic importance of the Indian Ocean Region in the Indo-Pacific geopolitical landscape and how India is managing China's rise by combining economic cooperation with a wide set of balancing strategies. The authors in this book critically analyse the various tools of Indian foreign policy, including

defence posture security alignments and soft power diplomacy among others and discuss the future trajectory of India's foreign policy and the factors which will determine the balance of power in the region and the potential risks involved. The book provides detailed insights into the multifaceted and complex relationship between India and China and will be of great interest to researchers and students of international relations, Asian studies, political science and economics. It will also be useful for policymakers, journalists and think tanks interested in the India-China relationship.

Great Britain. Her Majesty's Stationery Office, 1974 Messy Tim Harford, 2016-10-06 Ranging expertly across business, politics and the arts, Tim Harford makes a compelling case for the creative benefits of disorganization, improvisation and confusion. His liberating message: you'll be more successful if you stop struggling so hard to plan or control your success. Messy is a deeply researched, endlessly eye-opening adventure in the life-changing magic of not tidying up. Oliver Burkeman: The urge to tidiness seems to be rooted deep in the human psyche. Many of us feel threatened by anything that is vague, unplanned, scattered around or hard to describe. We find comfort in having a script to rely on, a system to follow, in being able to categorise and file away. We all benefit from tidy organisation up to a point. A large library needs a reference system. Global trade needs the shipping container. Scientific collaboration needs measurement units. But the forces of tidiness have marched too far. Corporate middle managers and government bureaucrats have long tended to insist that everything must have a label, a number and a logical place in a logical system. Now that they are armed with computers and serial numbers, there is little to hold this tidy-mindedness in check. It's even spilling into our personal lives as we corral our children into sanitised play areas or entrust our quest for love to the soulless algorithms of dating websites. Order is imposed when chaos would be more productive. Or, if not chaos, then messiness. The trouble with tidiness is that in excess it becomes rigid, fragile and sterile. In Messy, Tim Harford reveals how qualities we value more than ever—responsiveness, resilience and creativity—simply cannot be disentangled from the messy soil that produces them. This then is a book about the benefits of being messy: messy in our private lives, messy in the office with piles of paper on the desk and unread spreadsheets, messy in the recording studio, the laboratory or in preparing for an important presentation, and messy in our approach to business, politics and economics, leaving things vague, diverse and uncomfortably made up on the spot. It's time to rediscover the benefits of a little mess.
