## **Lifespan Neurorehabilitation**

Dennis Fell,Karen Y Lunnen,Reva Rauk,2018-01-02 The neuro rehab text that mirrors how you learn and how you practice Take an evidence based approach to the neurorehabilitation of adult and pediatric patients across the lifespan that reflects the APTA's patient management model and the WHO's International Classification of Function ICF You'll study examination and interventions from the body structure function impairments and functional activity limitations commonly encountered in patients with neurologic disorders Then understanding the disablement process you'll be able to organize the clinical data that leads to therapeutic interventions for specific underlying impairments and functional activity limitations that can then be applied as appropriate anytime they are detected regardless of the medical diagnosis

## **Oxford Case Histories in**

**Palliative Medicine** ,2025-01-08 Part of the Oxford Case Histories series this book guides medical professionals and trainees through 52 cases curated to illustrate the varied and often complex landscape of palliative medicine From advanced symptom management in non malignant disease to working in parallel with allied specialties such as oncology this book equips readers with diagnostic skills and clinical reasoning that helps temper knowledge and understanding with pragmatism and practicality in the face of life limiting illness Based on the core clinical curriculum for higher specialist training in palliative medicine each case starts with a short vignette followed by further information or study results before a series of questions ask for potential diagnoses actions or knowledge recall Answers are accompanied by discussion and suggestions for further reading enabling readers to gain the necessary skills for confident and competent diagnosis and management In addition a selection of non clinical cases examines other critical areas of frequently engaged expertise for the palliative care physician exploring themes of advance care planning resuscitation decisions ethics spirituality and UK law ensuring broad relevance to anyone looking after those with advanced incurable disease

## **The Rehabilitation and Management of**

**Long COVID** Danielle Hitch,Joanne Wrench,2025-09-12 This ground breaking volume provides the first comprehensive resource for health professionals managing the rehabilitation of people experiencing Long COVID Founded on therapeutic principles and evidence from other chronic conditions and informed by clinician and lived experience expertise the book advances the narrative of Long COVID from what do we know to what can we do It skilfully integrates the latest evidence of the condition with practical therapeutic tips supporting readers to develop the knowledge and skills needed to provide effective and respectful care for people with Long COVID The lived and living experience of those with the condition is embedded in every chapter Written by clinicians researchers and lived experience experts this book is an invaluable resource

for health professionals in all services and settings     *Bionic Limb Reconstruction* Oskar C. Aszmann, Dario Farina, 2021-01-04 This book presents the latest techniques in amputation rehabilitation and summarizes the most recent research findings in the field of bionic limb reconstruction. Divided into seven parts written by experts in the field, it provides valuable information on e.g. upper extremity injuries, psychological considerations, prosthetic engineering and surgical and rehabilitation strategies. Illustrative figures and photos of real life settings further assist understanding. This book is of interest not only for plastic surgeons but also for hand surgeons, orthopedic and trauma surgeons as well as therapists, prosthetists and engineers     *Acquired Neurogenic Communication Disorders* Jerry K. Hoepner, Margaret Lehman Blake, 2023-11-08 *Acquired Neurogenic Communication Disorders: An Integrated Clinical Approach* provides an overview of acquired neurogenic communication and swallowing disorders for undergraduate courses in communication sciences and disorders programs. Compared to other books on this subject, this text is organized by anatomical systems and locations, not by disorder. The authors aim to teach students about the cognitive, speech, language, and swallowing disorders that occur with damage to neurological systems in a manner that breaks down silos that artificially separate disorders that routinely co-occur. This approach reflects the reality that most individuals with acquired brain injuries have multiple cognitive, communication, and swallowing disorders. This clinical systems-based approach will better foster understanding of the effects of acquired damage and degeneration to neurological systems/networks. It includes cases to highlight the incidence and co-occurrence of speech, voice, language, cognitive, and swallowing impairments in real clients who experience these forms of damage. Cases are also representative of a broad range of racial and cultural characteristics, which highlight both similarities i.e. that anatomy and physiology are the same regardless of race and unique differences among people. Most chapters include clinical cases which integrate commonly co-occurring impairments. The intent is to help readers recognize that disorders like aphasia, dysarthria, dysphagia, and cognitive communication disorders don't usually occur in isolation but rather together. Many cases include questions to provoke thinking about the overlap between speech, language, cognition, and swallowing. Key Features: Clinical cases based on real clients embedded into chapters to illustrate specific characteristics of disorders. Full color layout and illustrations help students make connections between functions, anatomy, and clinical impairments. Assessment and Intervention tables summarize common assessments and interventions for speech, language, cognition, and swallowing. Concept tables include information about subtypes of disorders, components of complex functions, and frameworks. Boxes with activities and additional information to link the content to everyday experiences for generalization of learning. Additional pedagogical aids include chapter outlines, bolded key terms as well as Latin and Greek origins and meaning, concise chapter summaries, key concepts lists, and numerous references. Disclaimer: Please note that ancillary content such as practice activities, eFlashcards, and videos may not be included as published in the original print version of this book.

**Textbook of Pediatric Rheumatology E-Book** James T. Cassidy, Ross E Petty, Ronald M. Laxer, Carol B Lindsley, 2010-10-15 *Textbook of Pediatric Rheumatology E-Book* James T. Cassidy, Ross E Petty, Ronald M. Laxer, Carol B Lindsley, 2010-10-15
