2013 Grade 10 June Economics

Council of Economic Advisers (U.S.)

2013 Grade 10 June Economics:

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille, 2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis

The Economics of Cultural Diversity Peter Nijkamp, Jacques Poot, Jessie Bakens, 2015-08-28 The populations of many countries in the world are becoming more culturally diverse This spurs a growing need for an informed debate on the socio economic implications of cultural diversity This book offers a solid statistical and econometric perspective

Economic Indicators Council of Economic Advisers (U.S.), 2014

Deepening Neoliberalism, Austerity, and Crisis Julien Mercille, Enda Murphy, 2015-07-07 From bank bailouts to austerity Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors financiers bankers and the privileged are protected The authors expose the class based nature of Ireland's crisis resolution

The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding
