Energy and Sustainability V: Special Contributions C.A. Brebbia, S.S. Zubir, 2015-03-19 This volume contains special contributions presented at the 5th International Conference on Energy and Sustainability held by the Wessex Institute of Technology It is a companion to the Volume containing most of the contributions Vol 186 of WIT Transactions on Ecology and the Environment and comprises papers presented orally during the Conference The modern world is highly dependent on the exploitation of fossil fuels More recently resources depletion and severe environmental effects deriving from the continuous use of these fuels has resulted in an increasing amount of interest in renewable energy resources and the search for sustainable energy policies The changes required to progress from an economy mainly based on hydrocarbons to one taking advantage of sustainable energy resources are massive and require considerable scientific research as well as engineering systems The effect also involves collaboration between different disciplines in order to arrive at optimum solutions including buildings

energy networks convenience systems new energy storage solutions waste to energy technologies and many others This book along with its companion volume covers topics related to sustainability in energy and power production storage distribution and management These include Energy Policies Renewable Energy Resources Sustainable Energy Production Environmental Risk Management Green Buildings Energy Storage Biofuels Processing of Oil and Gas Drilling and Well Design CO2 Capture and Management Pipelines Energy Efficiency Energy from Waste Energy and Transportation **Airport Finance and Investment in the Global Economy** Anne Graham, Peter Morrell, 2016-10-04 While there are a multitude of publications on corporate finance and financial management only a few address the complexity of air transport industry finance and scant attention has been given to airport financial management This book deals exclusively with airport issues to rectify this It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the industry Airport Finance and Investment in the Global Economy bridges the gap between much academic research on airports published in recent years lacking much managerial relevance and real world airport financial management This is achieved by featuring expert analysis of contemporary issues specific to airport finance and funding strategies illustrated by worked examples from a wide range of different countries to enhance understanding and create a global perspective The book is designed to appeal to both practitioners and academics Airport specific topics include performance measurement and benchmarking valuation tools for financial control and management alternatives of financing privatisation competition and implications of economic regulation **Global Governance of Civil Aviation Safety** Nilgun Ozgur, 2022-09-30 This book indicates the shortcomings of the current international legal system and customary international norms that govern international aviation law to comply with contemporary air transport market realities As the air transport market develops globally the safety regime of civil aviation should also be governed and applied globally In this book the author departs from current international legal norms to examine the emerging legal field of global administrative law Through that lens the possibility of reconstructing the set of legal mechanisms that govern domestic and international administrative interaction in the global field of aviation safety is explored This book demonstrates that a legal system is never complete but always develops in tandem with changing needs i e the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area
