Sexuality Education that Prioritizes Sexual Well-Being: Initiatives and Impact Jacqueline Hendriks,Allison Carter ,Jessie Ford,2025-12-01 All children and young people should receive comprehensive sexuality education from a variety of sources that empowers them to develop a positive self identity and provides them with the tools necessary to form healthy relationships and to manage their own sexuality and sexual health The positive impact such education has for the health and well being of individuals communities and societies has been extensively documented in academic literature Despite the strong evidence base the actual provision of sexuality education can vary markedly across settings and countries and may often focus on biology the prevention of violence diseases or pregnancy and the use of fear based or sex negative messaging Contemporary international guidelines and extensive empirical research strongly encourage strengths based models that are sex positive and empower young people to develop healthy relationships and to learn about pleasure and sexual well being

Such programs are often grounded in human rights and ethical frameworks. In reality, specific examples of such programs and guidance about implementation are not easily accessible. Research and evaluation data may also be limited or not widely shared. The intention of this Research Topic is to showcase a variety of evidence based initiatives that prioritize and celebrate sexual well being through education. The impact of such programs shall also be explored alongside broader discussions about implementation, sustainability, replication and scaling. We are keen to spotlight initiatives that address a specific sexuality education topic alongside more extensive programs. A variety of age groups (preK-16) and educational settings (e.g. home, school, community, online) are welcome. Critically, a key attribute of any showcased initiative is that it seeks to provide education via sex positive approaches that address sexual well being, sex positivity and/or pleasure. This Research Topic welcomes research that includes but is not limited to the following: scientifically rigorous evaluations of educational interventions; empirical examinations of best practice in educational design; meta analyses of educational practice, innovation or pedagogies; barriers and enablers to program implementation; sustainability, replication and/or scale up; cross cultural and/or cross national studies; study protocols. Potential topics of interest include but are not limited to: Inclusion of young people in educational design; How pleasure discourse is contextualized within sexuality education curricula; Human rights Implementation challenges; Ethical issues; Adolescents' views on sex and pleasure education; The role of digital technology. We especially welcome submissions from young people, people from key populations and community based organizations. We request that submissions adhere to the principles of respectful and stigma free language.

to several different forms of research and practice is that efforts to challenge HIV GBV and unequal sexual and gender practices among young people particularly as evident in heterosexual relationships have tended to reflect and reproduce renewed orthodoxies about sexuality gender family and young people while bolstering global and local racist classist othering of certain communities and nation states and reiterating the innocence and authority of those already privileged and centred. The book contributes to critical reflexive work on global practices of knowledge and its complex enmeshment with power in the terrain of sexual and gender justice work aimed at young people     *The Trend Management Toolkit* A.
