The Question of Skill in Cross-Border Labour Mobilities Gracia Liu-Farrer,Brenda S.A. Yeoh,Michiel Baas,2023-03-31 Selecting migrants based on skill has become a widely practised migration policy in many countries around the world Since the late 20th century research on skilled and highly skilled migration has raised important questions about the value and ethics of skill based labour mobility More recent research has begun to question the concept of skill and skill categorisation in both government policy and academic research Taking the view that skills are socially constructed categories and highly malleable concepts in practice this edited volume centres the discussion on the following questions Who are the arbitrators of skill What constitutes skill And how is skill constructed in the migration process and in turn how does skill affect the mobility The empirical studies in this volume show that diverse actors are involved in the process of identifying evaluating and shaping migrant skill The interpretation of migrants skill is frequently distorted by their ascriptive characteristics such as race ethnicity gender and nationality reflecting the influence of colonial legacy global inequality as well as social stratification Finally this edited volume emphasises the complex and frequently reciprocal relationship between skill and mobility This book will be of interest to researchers and advanced students of Sociology Human Geography Politics Social Anthropology Economics and Social Work It was originally published as a special issue of the Journal of Ethnic and Migration Studies
