Lipid Signaling in T Cell Development and Function Karsten Sauer, Klaus Okkenhaug, 2015-11-12 Lipids are best known as energy storing molecules and core components of cellular membranes but can also act as mediators of cellular signaling This is most prominently illustrated by the paramount importance of the phospholipase C PLC and phosphoinositide 3 kinase PI3K signaling pathways in many cells including T cells and cancer cells Both of these enzymes use the lipid phosphatidylinositol 4 5 bisphosphate PIP2 as their substrate PLCs produce the lipid product diacylglycerol DAG and soluble inositol 1 4 5 trisphosphate IP3 DAG acts as a membrane tether for protein kinase C and RasGRP proteins IP3 is released into the cytosol and controls calcium release from internal stores The PI3K lipid product phosphatidylinositol 3 4 5 trisphosphate PIP3 controls signaling by binding and recruiting effector proteins such as Akt and Itk to cellular membranes Recent research has unveiled important signaling roles for many additional phosphoinositides and other lipids The articles in this volume highlight how multiple different lipids govern T cell development and function through diverse mechanisms and effectors In T cells lipids can orchestrate signaling by organizing membrane topology in rafts or microdomains direct protein function through covalent lipid modification or non covalent lipid binding act as intracellular or extracellular messenger molecules or govern T cell function at the level of metabolic regulation The cellular activity of certain lipid messengers is moreover controlled by soluble counterparts exemplified by symmetric PIP3 inositol 1 3 4 5 tetrakisphosphate IP4 signaling in developing T cells Not surprisingly lipid producing and metabolizing enzymes have gained attention as potential therapeutic targets for immune disorders leukemias and lymphomas

How Empire Shaped Us Antoinette Burton, Dane Kennedy, 2016-01-28 Few historical subjects have generated such intense and sustained interest in recent decades as Britain's imperial past What accounts for this preoccupation Why has it gained such purchase on the historical imagination How has it endured even as its subject slips further into the past In seeking to answer these questions the proposed volume brings together some of the leading figures in the field historians of different generations different nationalities different methodological and theoretical perspectives and different ideological persuasions Each addresses the relationship between their personal development as historians of empire

and the larger forces and events that helped to shape their careers The result is a book that investigates the connections between the past and the present the private and the public the professional practices of historians and the political environments within which they take shape This intellectual genealogy of the recent historiography of empire will be of great value to anyone studying or researching in the field of imperial history *Cxc Past Papers 95-98: Mathematics (Basic)*
