**The Anthropology of White Supremacy** Aisha M. Beliso-De Jesús, Jemima Pierre, Junaid Rana, 2025-01-28 White supremacy has shaped cultural anthropology from its inception yet the discipline also offers powerful tools for understanding how this corrosive force structures societies around the world The Anthropology of White Supremacy explores how this phenomenon works around the globe and within anthropology itself Gathering original essays from a diverse international group of anthropologists this collection illustrates that white

supremacy far from being only a fringe belief of white nationalists and fascists is a core mainstream ideology The book includes essays about many countries including Brazil Mexico Nigeria Norway Senegal South Africa and the United States and takes up such topics as American advertising the Belgian Congo South Asian philosophies police cadets U S immigration courts Guant namo memoirs Palestinian feminism Hollywood paparazzi and how Indigenous anthropologists can counter the damage of settler colonialism The result reveals not only how anthropology can help us to better comprehend white supremacy but also how the discipline can help us begin to dismantle it With contributions by Omolade Adunbi Samar Al Bulushi Aisha M Beliso De Jes s Michael Blakey Mitzi Uehara Carter Subhadra Mitra Channa Celina de S Vanessa Diaz Britt Halvorson Faye Harrison Sarah Ihmoud Anthony R Jerry Darryl Li Krist n Loftsd ttir Christopher Loperena Keisha Khan Y Perry Jemima Pierre Jean Muteba Rahier Laurence Ralph Renya K Ramirez Junaid Rana Joshua Reno Jonathan Rosa Shalini Shankar and Maria Styve

### Racial Segregation and Eugenical Science Between the Wars Michael L. Blakey,2025-07-18

This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies

### **Anthropology and Slavery at the Dawn of White Supremacy**

Michael L. Blakey,2025-07-18 This volume examines biological and cultural data that debunk a primordial basis for racism It tracks the ancient history of all social inequity to agricultural and feudal societies The book then focuses on social and

ideological developments in European societies associated with religious justifications for the enslavement of others The European Enlightenment built upon those prejudices with ideas about nature and acceptable natural causes of unequal social status for people newly classified into biological races Nineteenth century anthropology is critiqued by African diasporic scholars who are the first Americans to argue that nurture rather than nature is responsible for human variation The American Civil War brought slavery nearly to an end but racist science continued to grow as eugenics applied to justify otherwise unjustifiable structures of human inequality such as Jim Crow segregation as though they are morally sound In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies     *Unmarking Whiteness and the New American Racism* Michael L. Blakey, 2025-07-18 This book criticizes recent performative solutions to racism diversity programs at universities for example and White people's Fragility or intolerance of mature criticism These ideas are locked in an intellectually gated and defensive conversation that effectively denies the ongoing particular abuses of White supremacy This book instead proposes expensive educational and economic changes including reparations as necessary to achieve real equity Once imputed by the eugenical effects of World War II and the Civil Rights Movement's opposition to White racism the word race was largely stricken from scientific writing But biological determinism remained deeply ensconced in an institution of science that assumed the natural world to be determining making natural science its most authoritative means Authoritative heritability estimates and genetic correlations though spurious continued to imply that obvious racial and class inequalities including their dire health effects were natural and acceptable White people often attempted to unmark their racial identity and assumed that of the uniquely normal people as though an act of anti racism Frankenberg shows On the contrary it served to deny their skin color privileges while enjoying benefits of ongoing structural racism as the only real complete human beings in the room This book uses an ethnology of anthropology to show White people's equivocal views of others' equality in their formal analyses museum collections and exhibitions and treatment of colleagues in recent times They remained deliberately deaf to critical African diasporic scholarship Thus Unmarking gives an anthropological analysis of the social history of White supremacy and shows what it is like for some to confront it In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies

phenomena stretch toward their conceptual snapping points breaching the boundaries between the natural cultural and virtual Through examinations of the computational life sciences marine biology astrobiology acoustics and more Helmreich follows scientists to the limits of these categories Along the way he offers critical accounts of such other than human entities as digital life forms microbes coral reefs whales seawater extraterrestrials tsunamis seashells and bionic cochlea He develops a new notion of sounding as investigating fathoming listening to describe the form of inquiry appropriate for tracking meanings and practices of the biological aquatic and sonic in a time of global change and climate crisis Sounding the Limits of Life shows that life water and sound no longer mean what they once did and that what count as their essential natures are under dynamic revision    **Courses Catalog - University of Illinois at Urbana-Champaign** University of Illinois at Urbana-Champaign,2000 Includes undergraduate and graduate courses    **Courses and Degrees** Stanford University,1978
