## Subnetting IP Networks

*Frank Schneemann*

### Chapter 9: Subnetting IP Networks

Upon completion of this chapter you will be able to:

- Explain why routing is necessary for hosts on different subnets to communicate.
- Describe IP as a communication protocol used to identify a single device on a network.
- Given a network and subnet mask, calculate the number of host addresses available.
- Calculate the necessary subnet mask in order to accommodate a given number of hosts.
- Describe the benefits of variable length subnet masking (VLSM).
- Design and implement a hierarchical addressing scheme.
- Explain how IPv6 address assignments are implemented in a business network.

### Subnetting IP Networks

## Answer Cisco Chapter 9:

*All-in-One for Beginners (EBook, 13 Exam Engines, and Flash Cards)* Thaar AL\_Taiey, Sr., 2012-01-20 The book explains CISCO CCNA CCENT internetworking routing and switching concepts and guarantees the certification to the readers with a unique presentation in the field of internetworking. It is written like usual textbooks. The differences are in the way of presenting the required information which is so simple the addition of more than 2200 learning questions and the built in of 13 exam engines and flash cards. The learning questions at the end of a chapter represent a review to the information presented in that chapter as well as provide an easy way for the preparation of the real exam. The questions are made to focus on the important information. You have two options to read the questions and their answers either by using the built in exam engine at the end of each chapter or by reading the questions and their answers in the EBook. With more than 840 pages the book includes explanatory text and provides new types of test formats to simplify both the exam and the presenting of the information to the readers including over 2200 challenging multiple choices single answer multiple choices multiple answers fill in the blank testlet drag and drop and simulation test formats. A variety of internetworking scenarios and exhibits are used in this book to illustrate the topics related to the CISCO internetworking fundamentals. In line with modern training and teaching methodology the questions are included to encourage the reader to stop and think as well as to test his knowledge in preparation for a successful CCNA CCENT examination. The book also provides you three built in CISCO CCNA CCENT exams engines. The exams mimic the format on real CISCO exams. The exams are highly organized so that the reader can easily understand the concepts of the exams. To be more familiar with the real CISCO exam each exam in this book contains only 50-60 questions. Moreover the answers of the questions are comprehensively described so that you could understand the concepts behind each question very well and be more confident on the CISCO exam. The exams are made so that you could feel like on real CISCO exams. Therefore the questions in this book require the same level of analysis as the question on the CCNA CCENT ICND1 exams. Varieties of internetworking designing and troubleshooting scenarios are described in this book. While these scenarios prepare you for the exam you will obtain strong experiences on CISCO switches, CISCO routers, CISCO internetworking and the associated protocols and technologies. The three Simulated CISCO exams make you more confident in the real CISCO exam. CCENT is the essential certification for the CISCO internetworking routing and switching track. Understanding the CCENT topics and passing this exam successfully are crucial for those who want to be an Internetworking professional and is an easy mission just follow this book. The current track of the CCNA routing and switching contains two exams and two certifications the CCENT ICND1 exam 640 822 and the ICND2 exam 640 816. However it is possible to obtain the CCNA exam 640 802 by one exam and one certification. Now CCENT and CCNA are the most popular entry level networking and internetworking certification programs. The CCENT certification proves that you have a firm foundation in the networking and internetworking field and it proves that you have a solid understanding of IP.
