### Evaluating the Economy

#### Lesson 2 *Population Growth and Trends*

##### Review Questions

**Directions:** Read each main idea and then complete the statements below. Refer to your textbook as you write the answers.

##### A. Population in the United States

**Main Idea:** The census is a count and analysis of the U.S. population. It examines the number of people living in the United States, where they live, their income, and other key factors that help guide government policies.

1. The \_\_\_\_\_ of the United States requires the government to periodically take a \_\_\_\_\_, which is an official count of all the people living in the country and their place of \_\_\_\_\_.
2. The Census Bureau uses the \_\_\_\_\_ as its primary survey unit and classifies its data into categories like \_\_\_\_\_ and rural population.
3. In the United States, the rate of population growth is slowly \_\_\_\_\_, and there has been a steady trend toward \_\_\_\_\_ households.
4. Because it takes a long time to plan and construct a country's \_\_\_\_\_, it is important to understand changes in migration and \_\_\_\_\_ population trends.

##### B. Projected Population Trends

**Main Idea:** Changes in the type and number of different population groups help the government allocate resources and anticipate problems or changing circumstances. Immigration and the age structure of the nation's population are two such significant indicators.

1. A population \_\_\_\_\_ is a diagram that shows the population by age group and \_\_\_\_\_.
2. People born during the baby \_\_\_\_\_ that occurred after World War II make up a large segment of the population, and as they age it is changing the \_\_\_\_\_ ratio.
