Public Expenditure Management and Financial Accountability in Niger World Bank,2005 Effective efficient and transparent management of public resources is particularly important in a poor country like Niger This study shows how difficult it is for Niger to significantly change its expenditure composition in a short time span A narrow and volatile domestic resource base heavy dependence on aid and a large share of pre determined expenditures such as external debt payments are important factors behind this lack of flexibility There are ways though to create space in the budget for increasing public spending on priority sectors The study identifies a number of measures in this regard such as increasing domestic revenues more realistic and conservative budgeting strengthening cash management controlling the wage bill borrowing prudently and attracting higher external financing for recurrent costs in priority sectors The study also shows that enhancing the efficiency and transparency

of public spending is as important as increasing spending for priority sectors It thoroughly assesses public management systems in Niger and presents an action plan jointly elaborated by the Government and its main external partners to address the main challenges in this area This action plan contains a priority set of measures to improve budget preparation execution as well as internal and external oversight *Niger Delta* John K.
