PROBLEMS 1-2: Identifying Independent and Dependent Variables

Determine the independent and dependent quantities in each scenario. Be sure to indicate the appropriate units of measure for each quantity.

1 Assume a driver is driving a long distance averaging 50 miles an average of 60 miles per hour.

The number of miles **driven** depends on how long she drives.
Independent quantity: time (hours)
Dependent quantity: distance (miles)

2 Assume a driver is driving a car to a racing track for a high school competition team. The driver has to travel 3.5 miles per minute with the school's team.

3 For the relay race each morning, Sophie and her team eat a total of 1000 calories for the first relay race, and 1200 for the second race.

Big Picture Pedagogy: Finding Interdisciplinary Solutions to Common Learning Problems
Regan A. R. Gurung, David J. Voelker, 2017-10-02
Take a big picture look at teaching and learning. Building on existing pedagogical research, this volume showcases the scholarship of teaching and learning (SoTL) across the disciplines and takes it in a new direction. In each chapter, interdisciplinary teams of authors address a single pedagogical question, bringing each of their home disciplines' specific literature and methodologies to the table. The result is a fresh examination of evidence-based practices for teaching and learning in higher education that is intentionally inclusive of faculty from different disciplines. By taking a closer, more systematic look at the pedagogies used within the disciplines and their impacts on student learning, the authors herein move away from more generic teaching tips and generic classroom activities and toward values, knowledge and manner of thinking within SoTL itself. The projects discussed in each chapter furthermore will provide models for further research via interdisciplinary collaboration. This is the 151st volume of this Jossey Bass higher education series. It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

Brick by Brick Kjell Fenn, 2024-09-10
New or inexperienced teachers enter classrooms brimming with passion but often face challenges in engaging students, managing behavior and developing effective lessons. Using research-supported strategies, author Kjell Fenn guides new teachers through four pillars of successful teaching: planning, structure, engagement and confidence. Learn how to design assessments, craft lesson plans and find the structure for students and teachers to experience joy in the classroom. K-12 new and beginning teachers will explore the dynamics of student engagement with sixteen strategies to promote interest, bolster confidence through structured classroom routines, create lessons that engage students while satisfying standards and objectives, design quality assessments and plan units with confidence. Collect data on their classroom management and continuously refine their teaching methods.
