Annual Report Zoological Survey of India,1926 Corporate Climate Action, Transnational Politics, and World Order

Charlotte Hulme,2023-07-25 This book explores the origins and significance of the corporate climate action phenomenon which has attracted increased attention in recent years It examines how and why during the 2010s American German and Indian corporations spanning finance technology automotive and energy intensive industries adopted certain climate practices and converged around the idea that the private sector has a vital role to play in addressing climate change and advancing a low carbon future It also considers how policy developments that states widely understood as watersheds including the 2015 Paris Climate Agreement simply confirmed what the private sector had long believed that states lacked answers about how to achieve concerted ambitious and effective climate action It was in this context amid diminishing expectations for robust state climate action that select corporations sought to fill a perceived leadership vacuum in an issue area poised to shape future global trends Providing a novel assessment of the corporate sector as a climate actor this book evaluates how the shift in the center of gravity in the climate change issue area away from national governments and toward other players may influence world order and impact an international security landscape increasingly defined by non military challenges **Annual Report** Texas. Game, Fish, and Oyster Commission,1918 **Strategies for Managing Uncertainty**

Alfred A. Marcus,2019-03-28 Explains how energy industry firms have hedged their bets by using paradoxical strategies to cope with the uncertainty around energy prices and climate change **Annual Report** New Zealand Refining

Company,2005 **From Big Oil to Big Green** Marco Grasso,2022-05-03 How Big Oil can transform itself into Big Green through reparation and decarbonization to rectify the harm it has done through fossil fuels In From Big Oil to Big Green

Marco Grasso examines the responsibility of the oil and gas industry for the climate crisis and develops a moral framework that lays out its duties of reparation and decarbonization to allay the harm it has done. By framing climate change as a moral issue and outlining the industry's obligation to tackle it, Grasso shows that Big Oil is a central yet overlooked agent of climate ethics and policy. Grasso argues that by indiscriminately flooding the global economy with fossil fuels while convincing the public that halting climate change is a matter of consumer choice, that fossil fuels are synonymous with energy and that a decarbonized world would take civilization back to the Stone Age, Big Oil is morally responsible for the climate crisis. He explains that it has managed to avoid being held financially accountable for past harm and that its duty of reparation has never been theoretically developed or justified. With this book, he fills those gaps. After making the moral case for climate reparations and their implementation, Grasso develops Big Oil's duty of decarbonization, which entails its transformation into Big Green by phasing out carbon emissions from its processes and especially its products. *House documents*, 1883

The Governance Gap Penelope Simons,Audrey Macklin,2014-07-11 This book explores the persistence of the governance gap with respect to the human rights impacting conduct of transnational extractive corporations operating in zones of weak governance The authors launch their account with a fascinating case study of Talisman Energy s experience in Sudan informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan Harker Mission Drawing on new governance reflexive law and responsive law theories the authors assess legal and other non binding governance mechanisms that have emerged since that time including the UN Guiding Principles on Business and Human Rights They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by transnational corporations or of assuring accountability of these actors or recompense for victims of such violations The authors contend that home state regulation while not a silver bullet has a crucial role to play in regulating such conduct They pick up where UN Special Representative John Ruggie s Guiding Principles on Business and Human Rights left off and propose an innovative robust and adaptable template for strengthening the regulatory framework of home states Their model draws insights from the theoretical literature leverages existing public private transnational national soft and hard regulatory tools and harnesses the specific strengths of state based governance This book will be of interest to academics policy makers students civil society and business leaders
