## **2014 Global Regents Answer Key:**

**Carbon Societies** Peter Wagner, 2024-05-30 The climate crisis is humanmade Its main cause is the burning of fossil fuels To combat climate change we have to understand how we arrived at where we are This book explores the reasons why human societies have embarked on the trajectory of ever increasing use of fossil fuels Population growth desire for freedom from want and profit seeking all played major roles in shaping human history but there has been no inevitable drive towards heating up the atmosphere in the pursuit of social objectives To sustain a growing population more natural resources are required but their use does not need to generate climate change No logic of modernity links freedom with a kind of material abundance that requires the burning of fossil fuels No logic of capital necessarily ties the search for profit to the extraction of fossil resources Examining the critical junctures in human history when resource regimes changed this book identifies the social problems that were meant to be solved by burning fossil fuels and the power hierarchies that shaped the decisions to use them Wagner argues that the key choices that led to the climate emergency were made relatively recently during the second half of the 20th century they are close enough in time for us to undo the prevailing social logic of fossil fuels By redefining the key problems that humankind is facing and reshaping the existing mechanisms of power we can take the decisive action needed to reduce our dependence on fossil fuels and avert the worst consequences of climate change

**Belongs to the Poor** Patrick O'Hare, 2022-02-20 Rubbish Waste Trash Whatever term you choose to describe the things we throw away the connotations are the same of something dirty useless and incontrovertibly bad But does such a dismissive rendering mask a more nuanced reality In *Rubbish Belongs to the Poor* Patrick O'Hare journeys to the heart of Uruguay's waste disposal system in order to reconceptualize rubbish as a 21st century commons at risk of enclosure On a giant landfill site outside the capital Montevideo we meet the book's central protagonists the classifiers waste pickers who recover and recycle materials in and around its fenced but porous perimeter Here the struggle of classifiers against the enclosure of the landfill justified on the grounds of hygiene is brought into dialogue with other historical and contemporary enclosures from urban privatizations to rural evictions to shed light on the nature of contemporary forms of capitalist dispossession Supplementing this rich ethnography with the author's own insights from dumpster diving in the UK the book analyses capitalism's relations with its material surpluses and what these tell us about its expansionary logics limits and liminal spaces *Rubbish Belongs to the Poor* ultimately proposes a fundamental rethinking of the links between waste capitalism and dignified work Moral Mappings of South and North Peter Wagner, 2017-06-02
