Baumeister, 2019-12-31 From the international bestselling authors of Willpower Why does a bad impression last longer than a good one Why does losing money affect us more than gaining it What makes phobias so hard to shake The answer is the negativity bias or in other words the power of bad As John Tierney and Roy F Baumeister show we are wired to react to bad over good It makes sense in evolutionary terms but in our modern world the lure of bad is well bad It governs people s moods drives marketing and dominates our news It can explain everything from why wars start or couples divorce to why we mess up job interviews or feud with neighbours But there is good news By using smart strategies from new science we can train our brains to get better at spotting our own negativity bias fighting back with our rational minds to manage the bad in our lives and even using its power for positive results Breaking bad s hold over us can help our own lives at work and in our relationships Properly understood bad can be a good thing *After the Education Wars* Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers *After the Education Wars* helps us to see a better way forward Cathy N Davidson The New York Times Book Review *After the Education Wars* is an important book that points the way to genuine

reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world *After the Education Wars* explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform *After the Education Wars* makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools
