Busby, Adam J. Howat, Jacob E. Rothschild, Richard M. Shafranek, 2021-09-29 In the United States politics has become tribal and personalized The influence of partisan divisions has extended beyond the political realm into everyday life affecting relationships and workplaces as well as the ballot box To help explain this trend we examine the stereotypes Americans have of ordinary Democrats and Republicans Using data from surveys experiments and Americans own words we explore the content of partisan stereotypes and find that they come in three main flavors parties as their own tribes coalitions of other tribes or vehicles for political issues These different stereotypes influence partisan conflict people who hold trait based stereotypes tend to display the highest levels of polarization while holding issue based stereotypes decreases polarization This finding suggests that reducing partisan conflict does not require downplaying partisan divisions but shifting the focus to political priorities rather than identity a turn to what we call responsible partisanship **The Oxford Handbook of Human Development and Culture** Lene Arnett Jensen, 2015 The Oxford Handbook of Human Development and Culture provides a

comprehensive synopsis of theory and research on human development with every chapter drawing together findings from cultures around the world. This includes a focus on cultural diversity within nations, cultural change and globalization. Expertly edited by Lene Arnett Jensen, the Handbook covers the entire lifespan from the prenatal period to old age. It delves deeply into topics such as the development of emotion, language, cognition, morality, creativity and religion, as well as developmental contexts such as family, friends, civic institutions, school, media and work. Written by an international group of eminent and cutting edge experts, chapters showcase the burgeoning interdisciplinary approach to scholarship that bridges universal and cultural perspectives on human development. This cultural developmental approach is a multifaceted, flexible and dynamic way to conceptualize theory and research that is in step with the cultural and global realities of human development in the 21st century.

This volume addresses an important problem in social scientific research on global religions and spirituality: How to evaluate the role of diverse religious and spiritual R S beliefs and practices within the rapid evolution of spiritual globalization and diversification trends. The book examines this question by bringing together a panel of international scholars including psychologists, sociologists and researchers in religious studies, public health, medicine and social work. The content includes chapters describing innovative concepts of post-Christian spirituality, Eastern forms of meditation, afterlife beliefs associated with the three dominant cultural legacies, various non-religious worldviews, spiritual Jihad and secular and religious reverence. The book also covers such important themes as spiritual well-being, faith, struggle, meaning, making, modeling and support, as well as mysticism and using prayer to cope with existential crises. This book advances the understanding of the role of R S across different faiths and cultural systems, including both Western and non-Western ones, and enriches the mainstream of psychological sciences and practices. It appeals to students, educators, researchers and clinicians in multiple related fields and disciplines.
