Marine Greens Sesan Abiodun Aransiola, Oluwafemi Adebayo Oyewole, Naga Raju Maddela, Udemé Joshua Josiah Ijah, Bangeppagari Manjunatha, 2024-03-27 This book provides an in depth overview of marine greens and their environmental and biotechnological applications. It addresses concepts such as the niche adaptation strategies of marine greens in their natural habitats as well as their global distribution and factors affecting their distribution and proliferation. Marine greens are posited as an alternative to fossil fuels mitigating global climate change and thereby fostering future environmental sustainability. In addition, the book explains the remediation of xenobiotics, wastewater, microplastics, marine debris, and marine green contamination. Expert authors from around the world explore the industrial and agricultural applications of marine greens in the production of enzymes and marine bioenergy and what is needed to improve its production potential. This is important reading for government and non-governmental organizations as well as industries and research institutions looking for ways to combat current industrial and environmental challenges. *Microbial Taxonomy, Phylogeny and Biodiversity* Jesús L. Romalde, Sabela Balboa, Antonio Ventosa, 2019-12-31 The great diversity of microbial life is the remaining major reservoir of unknown biological diversity on earth. To understand this vast but largely unperceived diversity with its untapped genetic, enzymatic, and industrial potential, microbial systematics is undergoing a revolutionary change in its approach to describe novel taxa based on genomic and metagenomic information. The characterization of an organism is no longer bounded by methodological barriers and it is now possible to fully sequence the whole genome of a strain to study individual genes or to examine the genetic information by using different techniques. In fact, application of genomics is helping not only to provide a better understanding of the boundaries of genera and higher levels of classification but also to refine our definition of the species concept. In addition, increased understanding of phylogeny is allowing to predict the genetic potential of microorganisms for biotechnological applications and adaptation to environmental changes. The present Research Topic on Microbial Taxonomy, Phylogeny and Biodiversity compiles a collection of papers covering the use of genomic sequence data in microbial taxonomy and systematics, including evolutionary relatedness of microorganisms, application of comparative genomics in systematic studies, or metagenomic approaches for biodiversity studies. We hope that this eBook incentivizes and encourages researchers for future discussions on microbial taxonomy and phylogenetics.

Dealing with Mission Drift in Parachurch Agencies Israel K. Kombaté, 2025-01-31 Mission drift is a constant threat to any parachurch organization trying to remain mission true and holistically relevant in this post-Christian society. Defining it as a phenomenon in which Christian-based mission agencies stray from their God-given vision and identity towards socio-humanitarian objectives, this study considers this in light of Jesus's own holistic mission exemplified in Matthew 9:35-38 and Luke 4:18-19. This insightful investigation into seven Christian NGOs and NPOs seeks to reveal the underlying reasons and motivations for moving towards mission drift. Presenting an exegetical study of the ministry of Jesus, Dr. Kombaté offers a

developed and nuanced understanding of the challenging forces that contribute to mission drift and puts forward tools to minimize its risk A must read for missionaries pastors and leaders in parachurch organizations endeavouring to retain a strong biblically grounded commitment to following holistic mission

Cannabis and Khat in Drug Discovery Andrew G. Mtewa, Tadele Mekuriya, Paul E. Alele, John O. Igoli, Fanuel Lampiao, 2024-08-09 Cannabis and Khat in Drug Discovery The Discovery Pipeline and the Endocannabinoid System provides comprehensive coverage of two important psychoactive plants Khat and Cannabis Initial research has found that compounds and derivatives from Cannabis and Khat are found to have promising properties that can be used for the discovery design and development of potential drug leads against various diseases This book extensively discusses the drug discovery and allied sciences of these compounds in the drug discovery pipeline including basic research and computer aided modeling in ligand drug interactions and their interactions with the endocannabinoid system Categorized into sections including chemical analyses and bioassays medicinal chemistry chemical biology and pharmacology clinical applications and policy and regulations this book covers the methods and protocols involved and will be of interest to students researchers policymakers and all those involved in drug discovery research Covers the medicinal chemistry pharmacology and biological chemistry of cannabis khat their constituent compounds and metabolites Presents both the adverse and the beneficial entities to health and drug discovery Includes detailed methods and protocol information to allow easy replication and application

Elusive Phenomena, Unwieldy Things Jutta Schickore, William R. Newman, 2024-02-26 This open access book provides a historical treatment of scientific control in experimentation in the longue dur e The introduction distinguishes four related strands in the history of experimental control the development of practices to stabilize experimental conditions the career of the comparative design the unfolding of methodological discussions about control practices and designs and the history of the term control Each chapter brings these

distinctions to bear on specific historical episodes The focus is on experiments with complex elusive phenomena such as perception and learning irregular movements and unobservable elements Such experiments bring control issues to the fore because they are difficult to design and stabilize and often controversial Together the chapters show that the local context shapes what exactly is controlled how control can be accomplished and how controls are justified They also show that control strategies and methodological ideas often remain stable for a long time and change only gradually This book as well as the volume on analysis and synthesis in experimentation by the same editors contains contributions by an array of experts from multiple disciplines making it suitable for historians and philosophers of science and students alike

Everybody Wants to Go to Heaven but Nobody Wants to Die: Bioethics and the Transformation of Health Care in America Amy Gutmann, Jonathan D. Moreno, 2019-08-27 NOW FEATURING A NEW AFTERWORD PANDEMIC ETHICS From two eminent scholars comes a provocative examination of bioethics and our culture's obsession with having it all without paying the price Shockingly the United States has among the lowest life expectancies and highest infant mortality rates of any high income nation yet as Amy Gutmann and Jonathan D Moreno show we spend twice as much per capita on medical care without insuring everyone A remarkable highly readable journey Judy Woodruff sure to become a classic on bioethics Everybody Wants to Go to Heaven but Nobody Wants to Die explores the troubling contradictions between expanding medical research and neglecting human rights from testing anthrax vaccines on children to using brain science for marketing campaigns Providing a clear and compassionate presentation Library Journal of such complex topics as radical changes in doctor patient

relations legal controversies over in vitro babies experiments on humans unaffordable new drugs and limited access to hospice care this urgent and incisive history is required reading for anyone with a heartbeat Andrea Mitchell

Metagaming Stephanie Boluk, Patrick LeMieux, 2017-04-04 The greatest trick the videogame industry ever pulled was convincing the world that videogames were games rather than a medium for making metagames Elegantly defined as games about games metagames implicate a diverse range of practices that stray outside the boundaries and bend the rules from technical glitches and forbidden strategies to Renaissance painting algorithmic trading professional sports and the War on Terror In Metagaming Stephanie Boluk and Patrick LeMieux demonstrate how games always extend beyond the screen and how modders mappers streamers spectators analysts and artists are changing the way we play Metagaming uncovers these alternative histories of play by exploring the strange experiences and unexpected effects that emerge in on around and through videogames Players puzzle through the problems of perspectival rendering in Portal perform clandestine acts of electronic espionage in EVE Online compete and commentate in Korean StarCraft and speedrun The Legend of Zelda in record times with or without the use of vision Companies like Valve attempt to capture the metagame through international e sports and online marketplaces while the corporate history of Super Mario Bros is undermined by the endless levels of Infinite Mario the frustrating pranks of Asshole Mario and even Super Mario Clouds a ROM hack exhibited at the Whitney Museum of American Art One of the only books to include original software alongside each chapter Metagaming transforms videogames from packaged products into instruments equipment tools and toys for intervening in the sensory and political economies of everyday life And although videogames conflate the creativity criticality and craft of play with the act of consumption we don't simply play videogames we make metagames Library Literature & Information Science, 2009 An index to library and information science literature The Relationship Between Knowledge and Certainty Valery Berthoud, 2018-11-21 Academic Paper from the year 2018 in the subject Philosophy Miscellaneous grade 2 3 Humboldt University of Berlin course Wittgenstein's *Über Gewissheit* language English abstract The relationship between knowledge and certainty varies according to conception I argue that knowledge and certainty are usually equivalent but there are cases in which certainty is possible without knowledge and knowledge is possible without certainty The connection between knowledge and certainty does not change much when considering René Descartes philosophy because methodological skepticism consists of doubting beliefs that are uncertain That there exist external objects is uncertain because a malicious demon could be deceiving us by creating the illusion of an external world Although Descartes suggests that we can doubt all of our beliefs his conception of science consists of secure insight *Omnis scientia est cognitio certa et evidens* Descartes 1907 This means that all science is certain and evident knowledge or a high degree of certainty Three centuries later G E Moore had another reasoning when writing *A Defense of Common Sense and Proof of an External World* He suggests that doubting that the world exists is unnecessary we must trust that the universe exists He is against George Berkeley's suggestion that

matter does not exist everything is just ideas of the mind of God and to be is to perceive This is similar to propositions from Gottfried Wilhelm Leibniz who was an idealist because he claimed that all possible worlds lie in God and we are substances observing the best alternative Leibniz 2014 43 46 Moore suggests that it is irrational to believe such premises He held intuitions that a person has in everyday life the common sense philosophy We cannot be certain yet we claim to know many things Moore also purports that the external world is real and he tried to prove it Moore 1993a His argument goes as follows P1 Here is one hand P2 Here is another C1 There are at least two external objects in the world C2 Therefore an external world exists He argues that he had the experience of observing his hands and reiterates that at least his hands offer the sum of two objects which at a specified time existed Ibid **The Publishers' Circular and Booksellers' Record** ,1914 Social Sciences Index ,1994 Science Citation Index ,1994 Vols for 1964 have guides and journal lists
