

**INTRODUCTION**

This manual covers instructions for installing implement components on the 7200 and 8900 Series tractors. This includes the following items:

1. Monitors for drills and planters.
2. Controller for rear fold planters.
3. Marker control for planters and drills.
4. PTO hydraulic pumps for air drills and planters.

**8900 SERIES TRACTOR****General Electrical Procedures**

Disconnect the tractor battery before doing any electrical work. When routing a wire harness, keep the harness away from high temperature areas or sharp edges. Do not route the wire harness along battery cables. Use tie straps to keep the wire harnesses away from moving parts such as tractor hitch lift links or transmission shift linkage.

All ground connections to the tractor frame must be to clean, bare metal. Remove all dirt, paint and rust from the grounding surface to provide good electrical contact.

Connect the tractor batteries to the tractor after all of the electrical work is complete.

An electrical connector kit providing terminals and connectors for mounting monitors is available. See your dealer.
