While most people probably picture computers and cell phones when the subject of technology comes up, technology is not merely a product of the modern era. Just as the availability of digital technology shapes how we live today, the creation of stone tools changed how pre-modern humans lived and how well they ate. We all know that Checksheets are a set of questions or list of statements that will help us keep track of all the actions that have to be performed in a work. The purpose of these checklists is to reduce failures, increase consistency, and completeness in performing a specific task. No matter what size companies are constantly looking to increase productivity, efficiency, and performance. Naturally, the implementation of new technology can accomplish that.
