Targeting Maths Katy Pike, Judy Tertini, Garda Turner, 2004 Targeting Maths for Victoria Judy Tertini, 2006

Make: Geometry Joan Horvath, Rich Cameron, 2021-06-28 Geometry of all the branches of mathematics is the one that is most easily visualized by making something. However it is all too easy to reduce it to reams of formulas to memorize and proofs to replicate. This book aims to take geometry back to its practical roots with 3D printed models and puzzles as well as demonstrations with household objects like flashlights and paper towel tubes. This is not a traditional geometry textbook but rather builds up understanding of geometry concepts while also bringing in elements of concepts normally learned much later. Some of the models are counterintuitive and figuring out how and why they work will both entertain and give insights. Two final chapters suggesting open ended projects in astronomy and physics and art and architecture allow for deeper understanding and integration of the learning in the rest of the book.

Queensland Targeting Maths: Teaching guide

Judy Tertini, Katy Pike, 2004 *Geometry Teacher's Activities Kit* Judith A. Muschla, Gary Robert Muschla, 2000-04-12 For all math teachers in grades 6-12 this practical resource provides 130 detailed lessons with reproducible worksheets to help students understand geometry concepts and recognize and interpret geometry's relationship to the real world. The lessons and worksheets are organized into seven sections each covering one major area of geometry and presented in an easy to follow format including title focusing on a specific topic, skill learning objective, special materials if any, teaching notes with step by step directions, answer key and reproducible student activity sheets. Activities in sections 1-6 are presented in order of difficulty within each section while those in Part 7 A Potpourri of Geometry are open ended and may be used with most middle and high school classes. Many activities throughout the book may be used with calculators and computers in line with the NCTM's recommendations.
